# 1 Introduction

**E**stimate(Community Edition) hereafter referred to as **APPLICATION** is an efficient, web-based, robust and secure Construction Estimation Software which has been designed for Construction Project Estimation, Control and Execution from anywhere, anytime with error free results.

## 1.1 Features

### A. General:

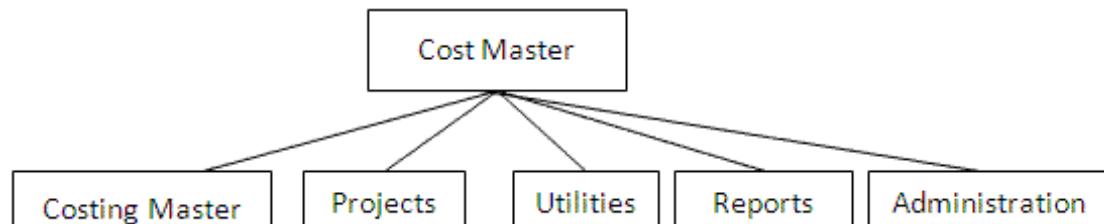

- a. Web-Based Solution
- b. Convenient, Interactive and Easily Adaptable User-Interface
- c. Customized to suit construction industry
- d. Time Saving
- e. Reduce Conflicts (Centralized Database)
- f. Error Free (Reduce Manual Interference)
- g. Secure (Administrator may Configure Access rights for registered users)
- h. Generate accurate Cost Estimates and Bill of Quantities for Projects

### B. Functional:

- a. Manage Schedule of Rates and Bill of Material
- b. Use Cost-Books to easily prepare Analysis of Rates
- c. Prepare Material Takeoffs and schedules
- d. Track and monitor project status and generate projections
- e. Manage documents and contacts
- f. On-the-fly generation of detailed reports in PDF format

## 1.2 Modules

There are five (5) basic modules in the application:

**Fig 1-1: Basic modules**

**Costing Master:** This module can be used to maintain database of items which are used/referenced frequently by other modules in the application, for example Assemblies, Bill of Material, Cost-Books.

**Projects:** Manage your projects and estimates through this module. Prepare material-takeoffs and project plans; gather as-built data from the site.

**Utilities:** This module provides general purpose utilities like calculator, unit converter, document manager, contact directory.

**Reports:** APPLICATION has an independent Reports module for Generating detailed and useful reports in PDF format.

**Administration:** Use this module to execute administrative functions like user-management and configuration of access-right.

These modules have been further subdivided into a number of sub-modules and interfaces.

## 2 Getting Started

### 2.1 Logging-in

Open your favorite web-browser (Internet Explorer 7 or above recommended) and enter the address of the hosted application. A login-screen will appear (fig 2-1). Enter username and password and click on Login button.

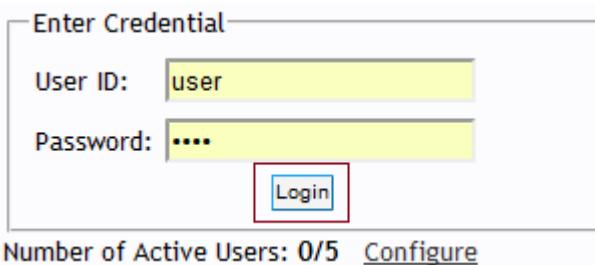

Fig 2-1: The login-box

### 2.2 User Interface

#### 2.2.1 Workspace

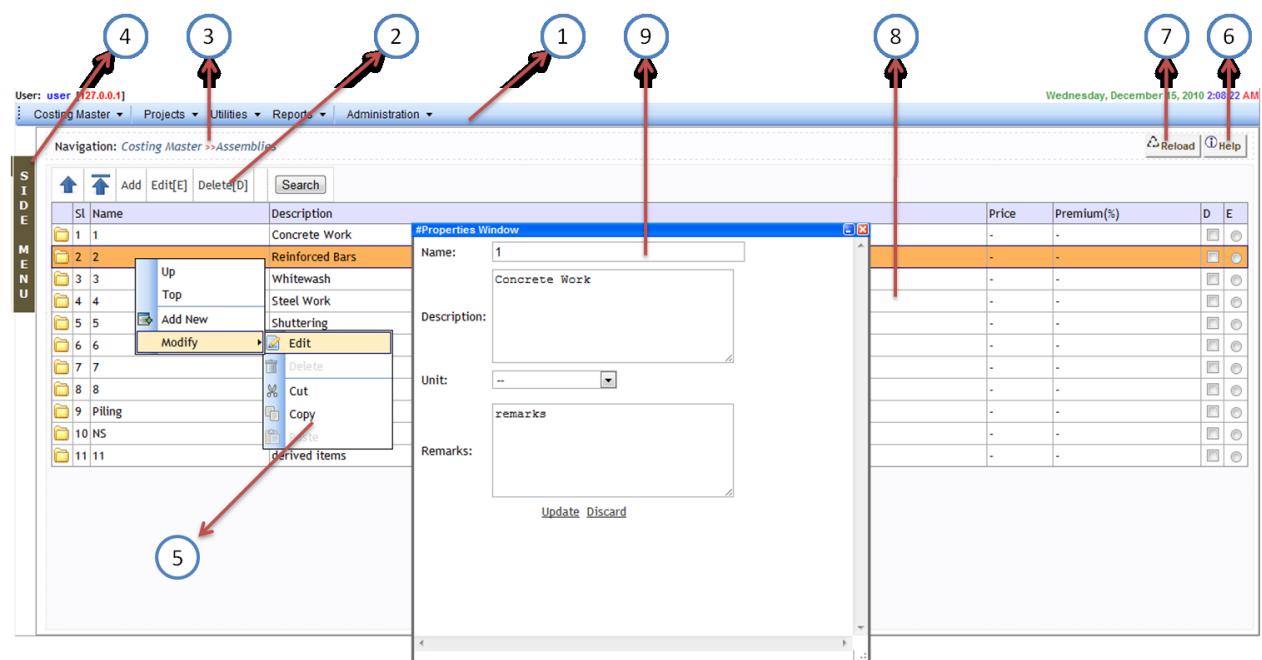

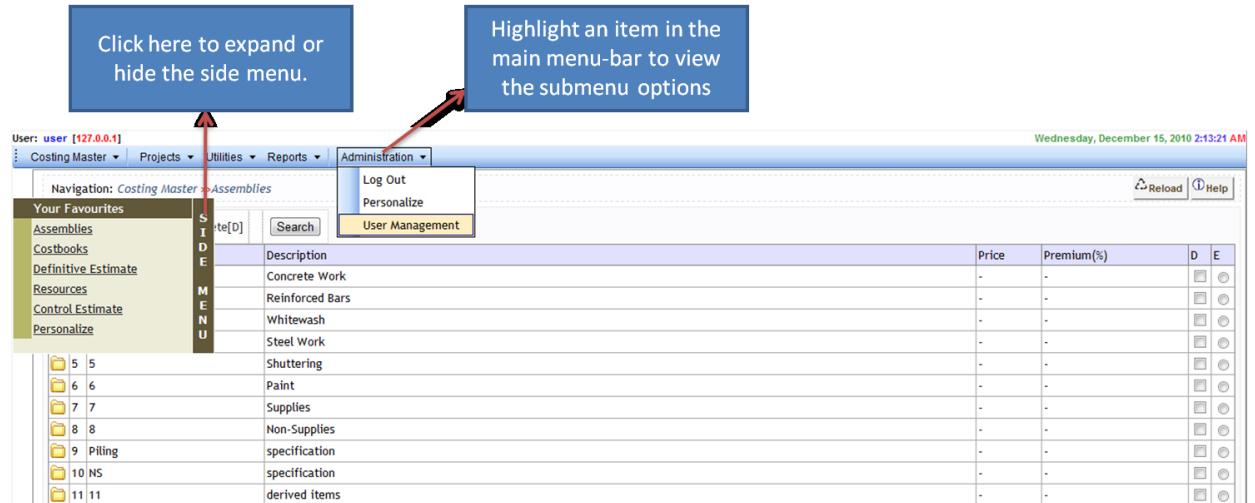

Fig 2-2: User Interface

1. **Main menu-bar:** Menu options inside the main menu-bar provide access to APPLICATION's modules.
2. **Workspace menu:** Contains controls for working with the database e.g. navigation, edit, delete etc.
3. **Navigation bar:** Displays the currently loaded module.
4. **Side Menu:** Expands on click, lists frequently used modules.
5. **Context Menu:** Appears on right-click inside the content-table, select menu-options to perform actions on database.
6. **Help button:** Use this button to open help contents for the currently loaded module.
7. **Refresh Button:** Use this button to refresh the data in content-table.

8. **Content Table:** Database contents are loaded and displayed in this table.
9. **Internal Window:** Internal DHTML window opens inside the workspace.  
Window can be resized, minimized, restored and closed like normal windows.

### 2.2.2 Navigating Around

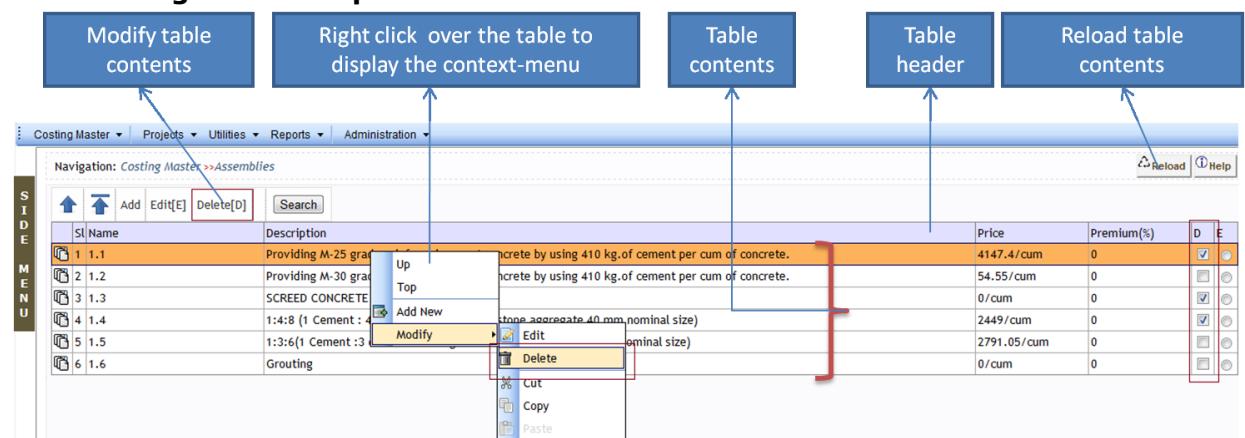

**Fig 2-3:** Using main-menu and side-menu

Modules of APPLICATION can be accessed by selecting one of the menu-options in the main menu-bar.

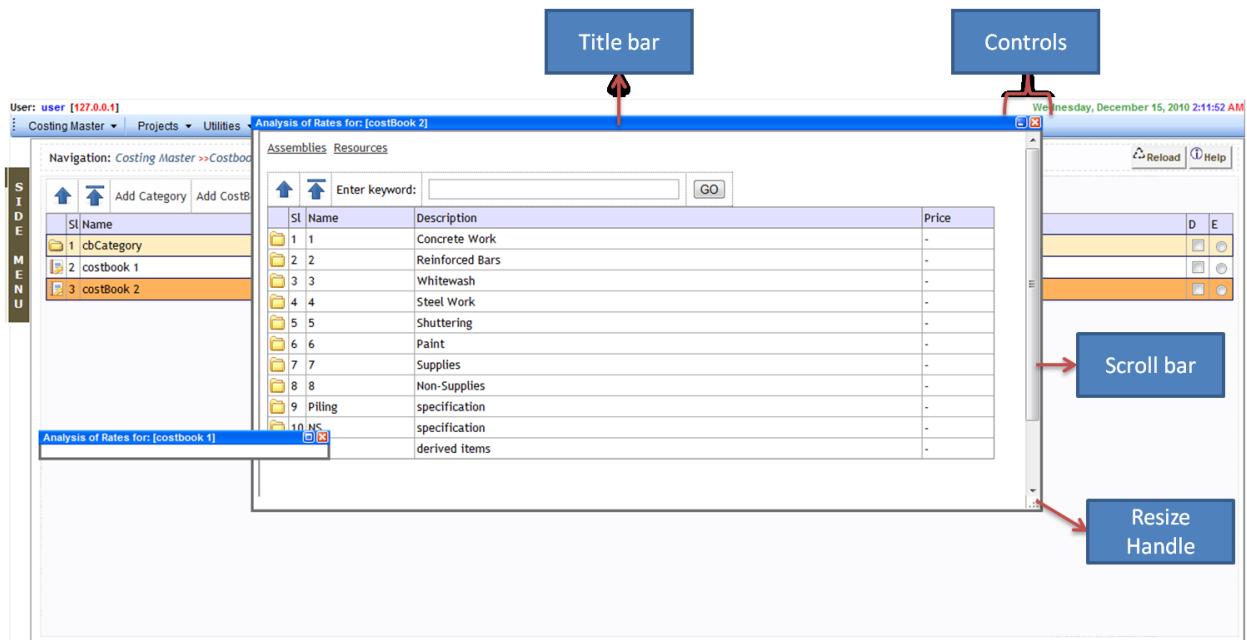

Side menu-bar displays a list of most frequently accessed modules. Click on one of the listed items to load corresponding module into the workspace.

### 2.2.3 Using the Workspace

**Fig 2-4:** Using the workspace

Select options from the workspace menu and context menu to modify the items listed in the content-table.

**Fig 2-5:** Internal windows

Internal windows are similar to desktop windows, but they are bounded inside APPLICATION's workspace. Internal windows generally appear while working with the items of the content-table. In case multiple internal windows have been opened inside the workspace, one of the windows may be made **active** by clicking over its title bar, all overlapping windows will be tiled at the back of the active window. Click on title bar of a window and drag to move the selected window. Click over the resize handle and drag to resize the window.

Other UI elements and features will be introduced in later parts of the user guide.

### 3 Costing Master

Costing Master is a collection of features which provides the capability to create, modify, navigate and build "Schedule of Rates", "Specification of Resources" and "Analysis of Rates".

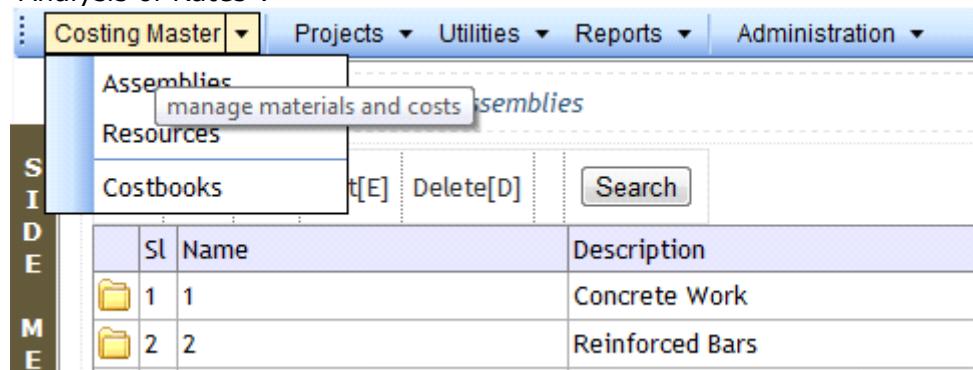

Fig 3-1: Costing Master menu

#### **Getting Started**

Expand the "Costing Master" menu in Main menu-bar, menu options may be used to access following modules:

**Assemblies:** Assemblies are the basic building blocks of any construction estimate. Assemblies also known as "Schedule of Rates", "Schedule of Works" are the specifications of works which are to be carried out in a project. Every organization maintains a database of specification of works with their detailed description, detailed analysis, and unit-rates. **APPLICATION** provides a central repository for maintaining the database of assemblies.

**Resources:** Construction projects require variety of resources (Material, Manpower and Equipment). **APPLICATION** provides a central repository for maintaining specifications of generally used resources, including detailed description, unit and standard rate (prices can be modified through CostBooks module).

**CostBooks:** Unit-rates of assemblies change across projects. CostBook module is used to prepare "Analysis of Rates" of assemblies on the basis of resource requirements, miscellaneous charges and overheads. Unit-rates of assemblies are derived from their analysis of rate.

#### **3.1 Assemblies**

Following tutorial guides a user through the process of using the **Assemblies** module.

##### **3.1.1 Moving Around**

Select Costing Master-> **Assemblies** from main menu-bar to load the **Assemblies** module.

Costing Master >> Assemblies									
Costbooks		[E]	Delete[D]	Search					
SL	Name	Description			Price	Premium(%)	D	E	
1	4.1	Structural steel work in single section fixed with or without connecting plate including cutting, hosting, fixing in position and applying a priming coat of approved steel primer all complete.			42.15/kg	0	<input type="checkbox"/>	<input checked="" type="radio"/>

**Fig 3-2-b:** Viewing the list of assemblies

Assemblies may be arranged in categories. Click on the "category icon" to view all items under a selected category. E.g. click on the "category icon" on the left of the category named "Concrete Works" to view all items listed under "Concrete Works". Click on "up icon" to move back to the parent category. Click on "top icon" to move back to the top level.

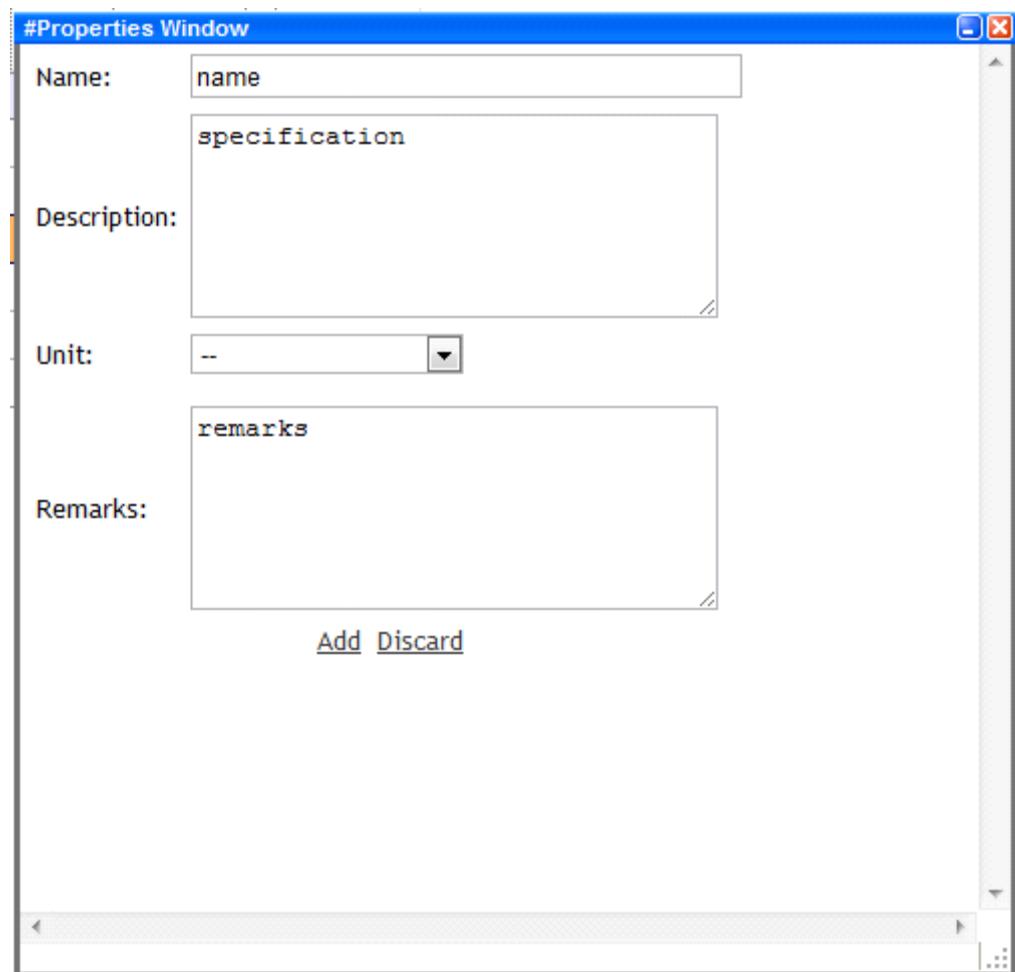

### 3.1.2 Adding a new Assembly

Click on "Add" inside the workspace menu. Alternatively right click over the content-table and select "Add New" from the context menu.

Costing Master >> Assemblies								
Navigation: Costing Master >> Assemblies		Add	Edit[E]	Delete[D]	Search			
SL	Name	Description			Price	Premium(%)	D	E
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.			4147.4/cum	0	<input type="checkbox"/>	<input checked="" type="radio"/>
2	1.2	Providing M-30 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.			54.55/cum	0	<input type="checkbox"/>	<input checked="" type="radio"/>
3	3.1.3	SCREED CONCRETE			0/cum	0	<input type="checkbox"/>	<input checked="" type="radio"/>
4	4.1.4	1:4:8 (1 Cement : 4 coarse sand : 8 graded stone aggregate 40 mm nominal size)			2449/cum	0	<input type="checkbox"/>	<input checked="" type="radio"/>
5	5.1.5	1:3:6(1 Cement :3 coarse sand :6 graded stone aggregate 20 mm nominal size)			2791.05/cum	0	<input type="checkbox"/>	<input checked="" type="radio"/>
6	6.1.6	Grouting			0/cum	0	<input type="checkbox"/>	<input checked="" type="radio"/>

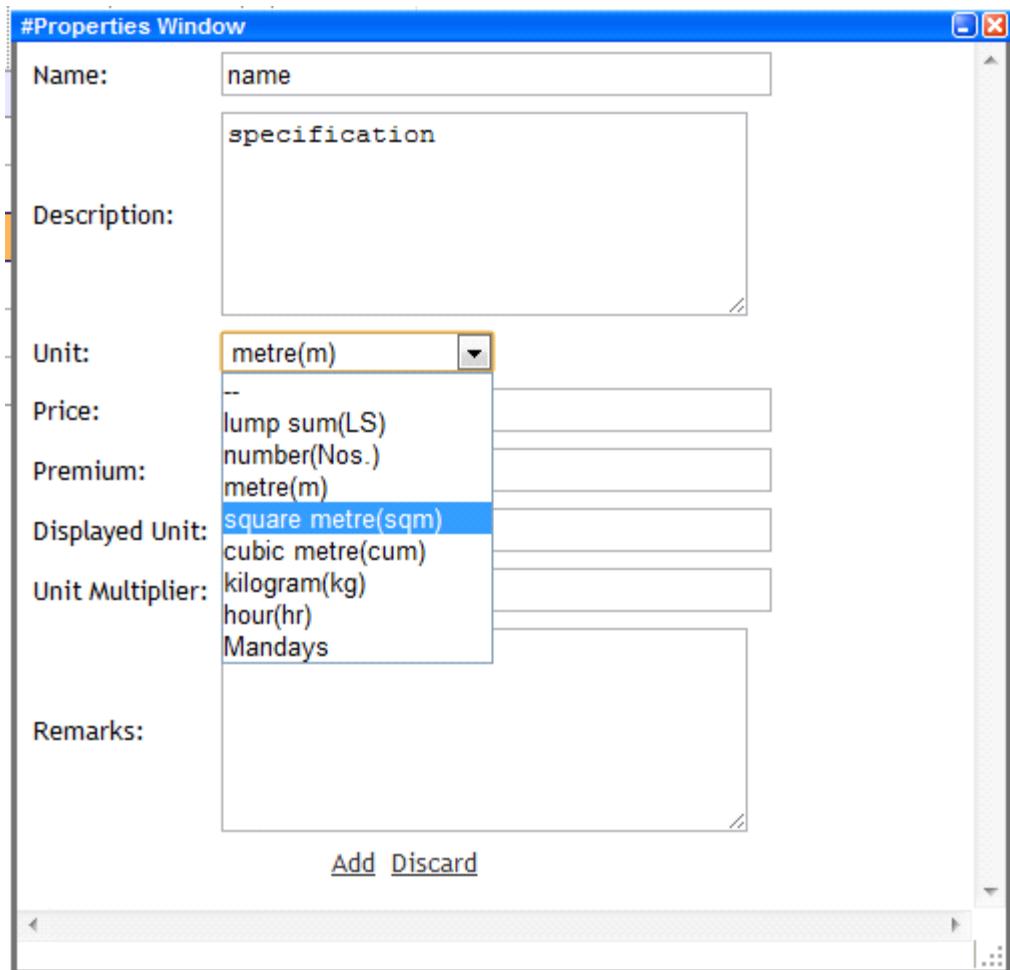

**Fig 3-3-a:** Adding a new assembly

A properties window will appear inside the workspace.

**Fig 3-3-b:** Adding a new category

**Adding a category:** Leave the unit field blank (--). All fields are mandatory, and must be filled. Click on "Add" to add a new category. Click over "Discard" to close the Properties Window without making any changes.

**Fig 3-3-c:** Adding a new assembly

**Adding a new assembly:** Select a unit from the drop-down list. Following additional fields must be filled:

**Price:** Enter the Unit Price

**Premium:** Enter the premium amount (% over the unit rate).

**Displayed Unit:** If unit to be displayed in the reports is different from the standard unit, enter the display unit in the text-box, or leave it to default ("") or blank if not applicable.

**Unit Multiplier:** Enter the conversion factor from the displayed unit to the standard unit (e.g. if the displayed unit is 100cum and the standard unit is cum, unit multiplier will be 100). Value of Unit Multiplier will be ignored if Displayed Unit is set to "" or blank.

**Note:** all fields are mandatory; leaving any field blank will generate a "System Error".

### 3.1.3 Editing an Existing Assembly

Select an assembly through radio-button, and click on "Edit" option inside the workspace menu. Alternatively right click over an assembly and select Modify->Edit from the context menu.

Sl	Name	Description	Price	Premium(%)	D	E
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.	4147.4/cum	0	<input type="checkbox"/>	<input type="radio"/>
2	1.2	Providing M-30 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.	54.55/cum	0	<input checked="" type="checkbox"/>	<input type="radio"/>
3	1.3	SCREED CONCRETE	0/cum	0	<input type="checkbox"/>	<input type="radio"/>
4	1.4	1:4:8 (1 Cement : 4 Sand : 8 Stone Aggregate nominal size)	2449/cum	0	<input type="checkbox"/>	<input type="radio"/>
5	1.5	1:3:6(1 Cement : 3 Sand : 6 Stone Aggregate nominal size)	2791.05/cum	0	<input type="checkbox"/>	<input type="radio"/>
6	1.6	Grouting	0/cum	0	<input type="checkbox"/>	<input type="radio"/>

**Fig 3-4-a:** Editing an assembly

Name:	1.2
Description:	Providing M-30 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.
Unit:	cubic metre(cum)
Price:	54.55
Premium:	0
Displayed Unit:	%cum
Unit Multiplier:	100
Remarks:	5 . 34

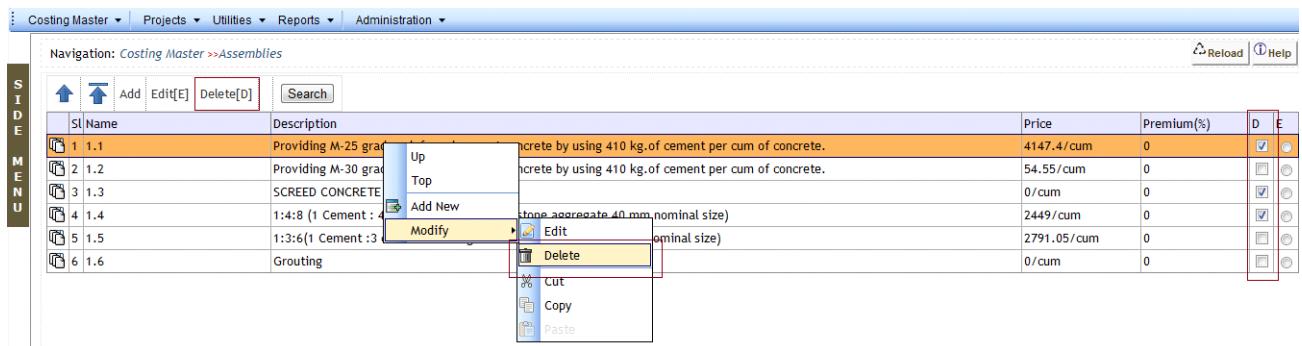

Update Discard

**Fig 3-4-b:** properties window showing details of a selected assembly

Properties window containing current details of the selected assembly will appear inside the workspace. Make required changes and click on "Update" to complete the request. Click on "Discard" to close the Properties Window without making any changes. No field can be left blank.

### 3.1.4 Deleting Assemblies

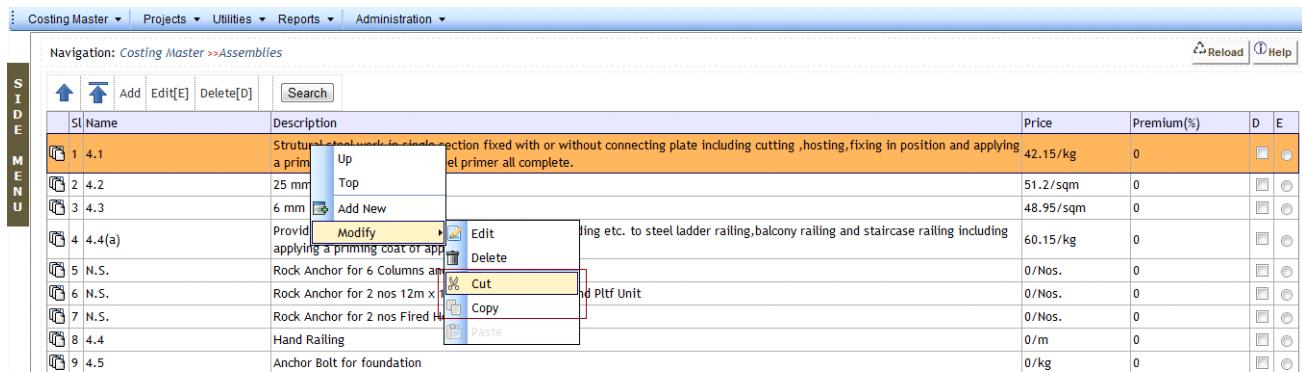

Select one or more assemblies through checkboxes and click on "Delete" option inside the workspace menu to delete selected items. Alternatively right click over an assembly and select Modify-> Delete from the context menu. Please note that there is no option available to restore back the deleted items.

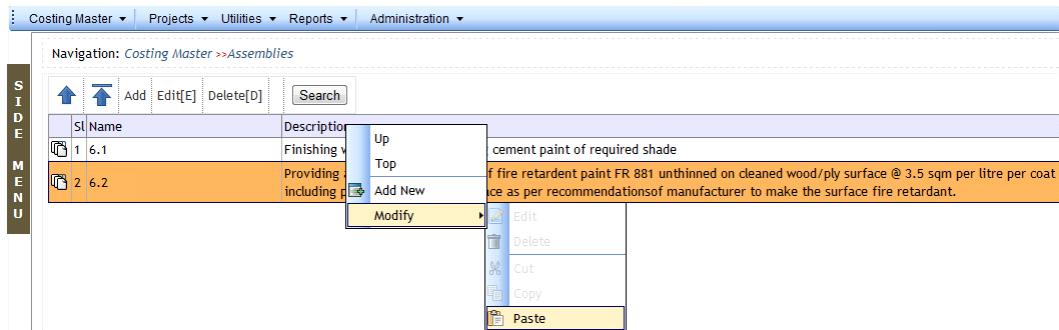

**Fig 3-5:** Deleting assemblies

### 3.1.5 Moving or Copying Assemblies

Right click over an assembly and select Modify->Cut to move it or select Modify->Copy to copy it. Navigate to destination category and select Modify->Paste from context menu to complete the request. "Paste" option in the context menu will be available only if an item has already been selected to be moved or copied.

**Fig 3-6-a:** Moving/Copying assemblies

**Fig 3-6-b:** Moving/Copying assemblies to another category

## 3.2 Resources

This guide provides basic instructions on using the **Resources** module.

### 3.2.1 Moving Around

Select Costing Master-> **Resources** from the main menu-bar to list resources (material, manpower, equipments) and categories stored in the database.

SL	Name	Description	Price	D	E
1	others	All items not listed elsewhere	-	<input type="checkbox"/>	<input type="radio"/>

5	0982	Coarse sand	600/Cum	<input type="checkbox"/>	<input checked="" type="radio"/>

**Fig 3-8-a:** Adding a new category or resource

Properties window will appear inside the workspace. Fill in the details and select "Add" inside the properties window to complete the process. Select "Discard" to close the properties window without making any changes. All fields are mandatory.

**Fig 3-8-b:** Properties window for adding a new category

**Fig 3-8-c:** Properties window for adding a new resource

### 3.2.3 Editing an existing Category or Resource

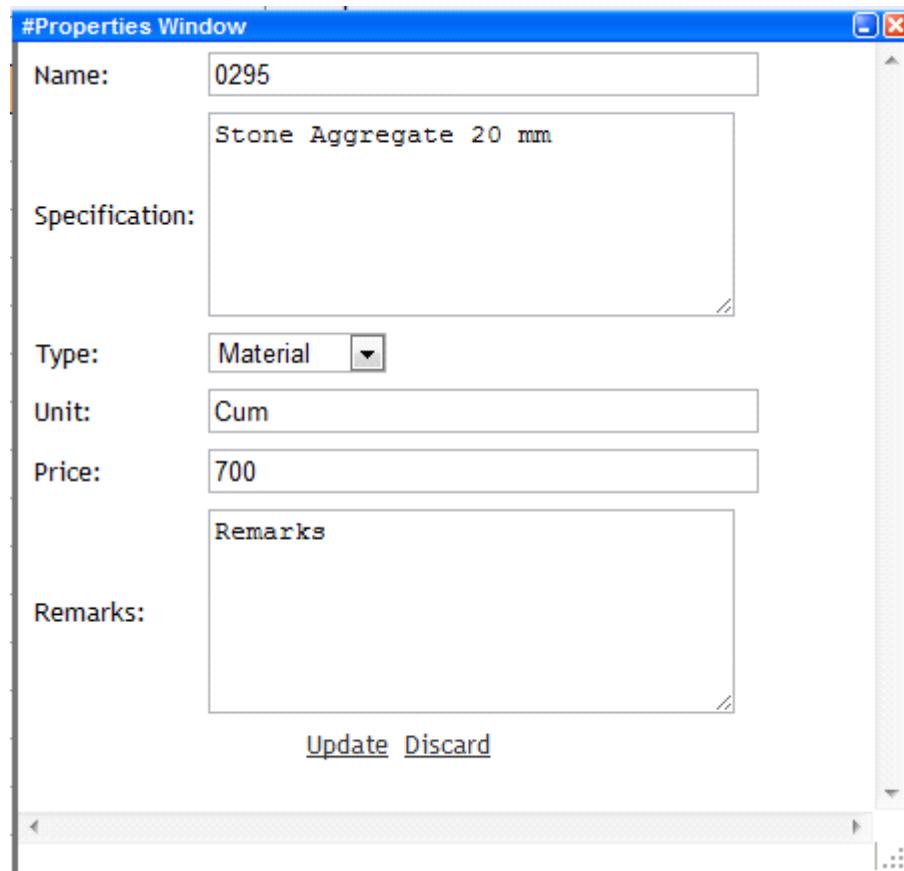

Select an item through radio-button, and click on "Edit" option inside the workspace menu. Alternatively right click over a category or resource and select Modify->Edit from the context menu.

The screenshot shows the 'Costing Master >>Resources' workspace. A context menu is open over item '2 0295 Stone Ag'. The 'Edit' option is highlighted. Other options in the menu include 'Up', 'Top', 'Add New', 'Modify', 'Delete', 'Cut', and 'Paste'.

SL	Name	Description	Price	D	E
1	others	All items not listed elsewhere	-		
2	0295	Stone Ag	700/Cum		
3	0297	Stone Ag	700/Cum		
4	2202	Carriage	53.21/Cum		
5	0982	Coarse s	600/Cum		
6	2203	Carriage	53.21/Cum		
7	0367	Cement	4500/Tonne		
8	2209	Carriage of cement	47.29/Tonne		
9	7318	Plasticizer 0.50% of cement.	30/Kg		

**Fig 3-9-a:** Editing a category or resource

Properties window containing current details of the selected category/resource will appear inside the workspace. Click on "Update" option at the bottom of the properties window to commit the changes. Click on "Discard" option to close the properties window discarding the changes.

**Fig 3-9-b:** Properties window displaying the current details of a selected Resource

### 3.2.4 Deleting existing Categories and Resources

Select one or more items (categories/resources) from the content table through checkboxes and then click on "Delete" inside the workspace menu to delete selected items. Alternatively, right click over an item and select Modify-> Delete from the context menu. Please note that there is no option available to restore back the deleted items.

The screenshot shows the Costing Master application interface with the following details:

- Navigation:** Costing Master >>Resources
- SIDE MENU:** Shows options like Add Category, Add Item, Edit[E], Delete[D], and Search.
- Content Table:** A grid of resources with columns: Sl, Name, Description, Price, and checkboxes for D and E.
- Row 2 (Selected):** Resource ID 0295, Name Stone Aggregate 20 mm, Description All items not listed elsewhere, Price 700/Cum.
- Context Menu (Right-clicked on row 2):** Options include Up, Top, Add New, Modify, Edit, Delete, Cut, and Paste.
- Buttons at the top:** Reload and Help.

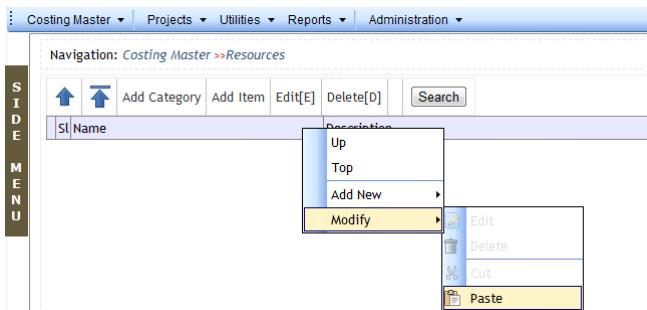

**Fig 3-10:** Deleting items from database

### 3.2.5 Moving or Copying Categories/Resources

Right click over an item and select Modify->Cut to move the item. Navigate to destination category and select Modify->Paste from the context menu to complete the request. "Paste" option in the context menu is available only if an item has already been selected to be moved or copied. "Copy" option is not available in the current package.

SL	Name	Description	Price	D	E
1	others	All Items not listed elsewhere	-	<input checked="" type="checkbox"/>	<input type="radio"/>
2	0295	Stone Aggregate 20 mm	700/Cum	<input checked="" type="checkbox"/>	<input type="radio"/>
3	0297	Stone Aggregate 10 mm.	700/Cum	<input type="checkbox"/>	<input checked="" type="radio"/>
4	2202	Carriage of aggregate 20 mm.	53.21/Cum	<input checked="" type="checkbox"/>	<input type="radio"/>

7	0367		4500/Tonne	<input type="checkbox"/>	<input checked="" type="radio"/>
8	2209	cement	47.29/Tonne	<input type="checkbox"/>	<input checked="" type="radio"/>
9	7318	Plasticizer 0.50% of cement.	30/Kg	<input type="checkbox"/>	<input checked="" type="radio"/>

**Fig 3-11-a:** Moving an item

**Fig 3-11-b:** Moving an item into another category

### 3.3 CostBooks

CostBooks module is used to prepare accurate "Analysis of Rates".

#### 3.3.1 Moving Around

Select Costing Master->**CostBooks** from the main menu-bar to access the list of existing cost-books and categories.

SL	Name	Description	D	E
1	cbCategory	Specification for cbCategory	<input type="checkbox"/>	<input checked="" type="radio"/>
2	costbook 1	specification	<input type="checkbox"/>	<input checked="" type="radio"/>
3	costBook 2	specification	<input type="checkbox"/>	<input checked="" type="radio"/>

**Fig 3-12-a:** Accessing the CostBooks module from main menu-bar

SL	Name	Description	D	E
1	cbCategory	Specification for cbCategory	<input type="checkbox"/>	<input checked="" type="radio"/>
2	costbook 1	specification	<input checked="" type="checkbox"/>	<input type="radio"/>
3	costBook 2	specification	<input type="checkbox"/>	<input checked="" type="radio"/>

**Fig 3-12-b:** Navigating through the content-table

Cost-books may be arranged in categories. Click on the "category icon" to view all cost-books under a category. Click on "up icon" inside the workspace menu to move back to the parent category. Click on "top icon" to move back to the first level.

### 3.3.2 Adding a new Category or Cost-Book

**Adding a new Category:** Click on "Add Category" option inside the workspace menu to add a new category. Alternatively, right click inside the content-table and select Add New->New Category from context menu.

**Adding a new Cost-Book:** Click on "Add CostBook" option inside the workspace menu to add a new cost-book. Alternatively, right click inside the content-table and select Add New-> New CostBook from context menu.

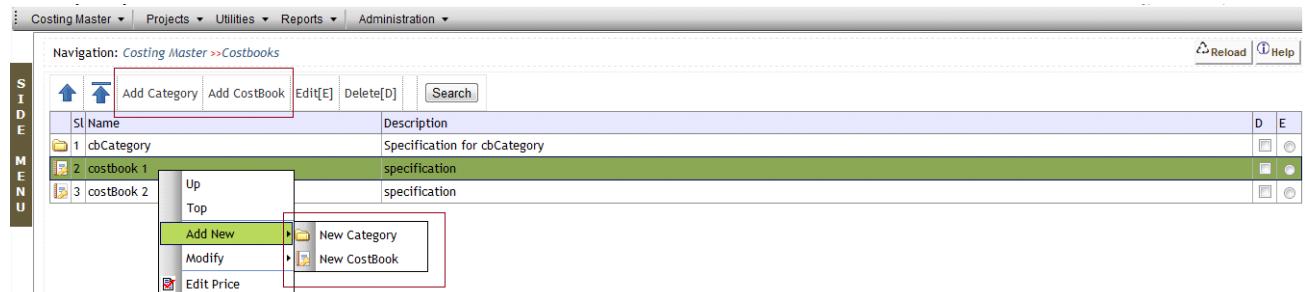

Fig 3-13-a: Adding a new category or cost-book

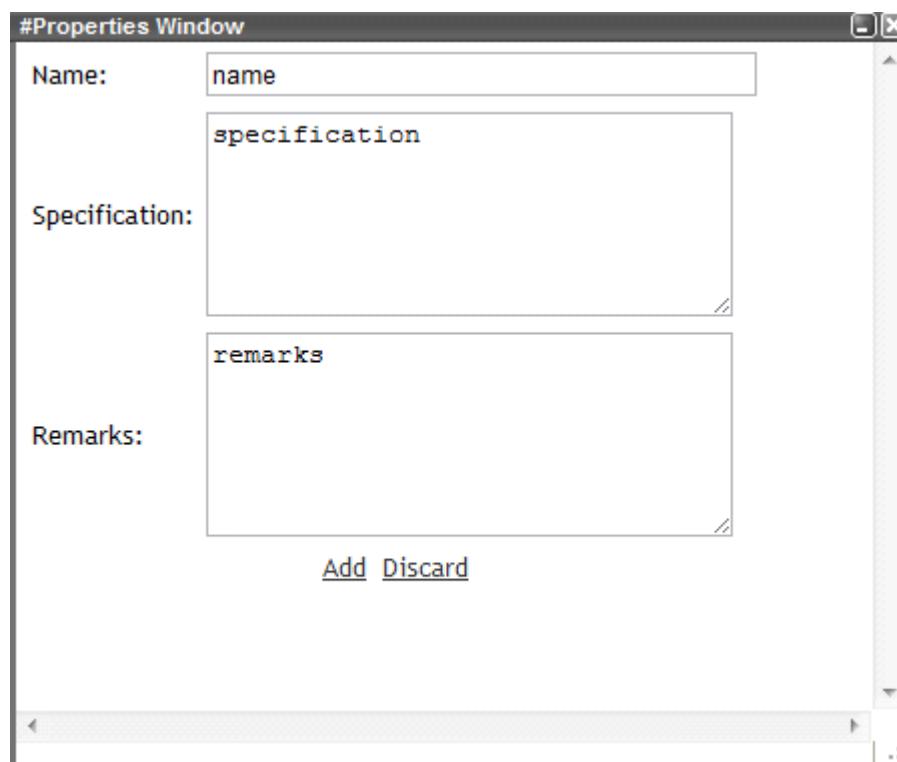

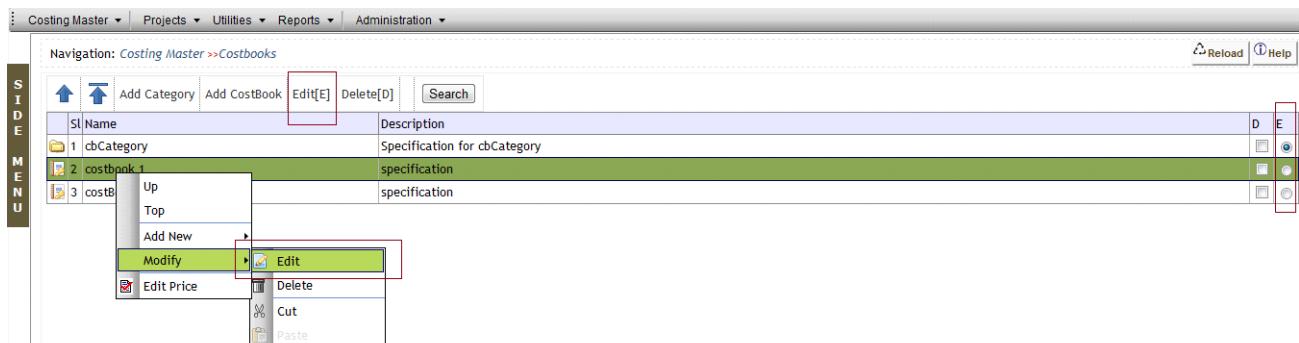

Fig 3-13-b: Properties window for adding a new item

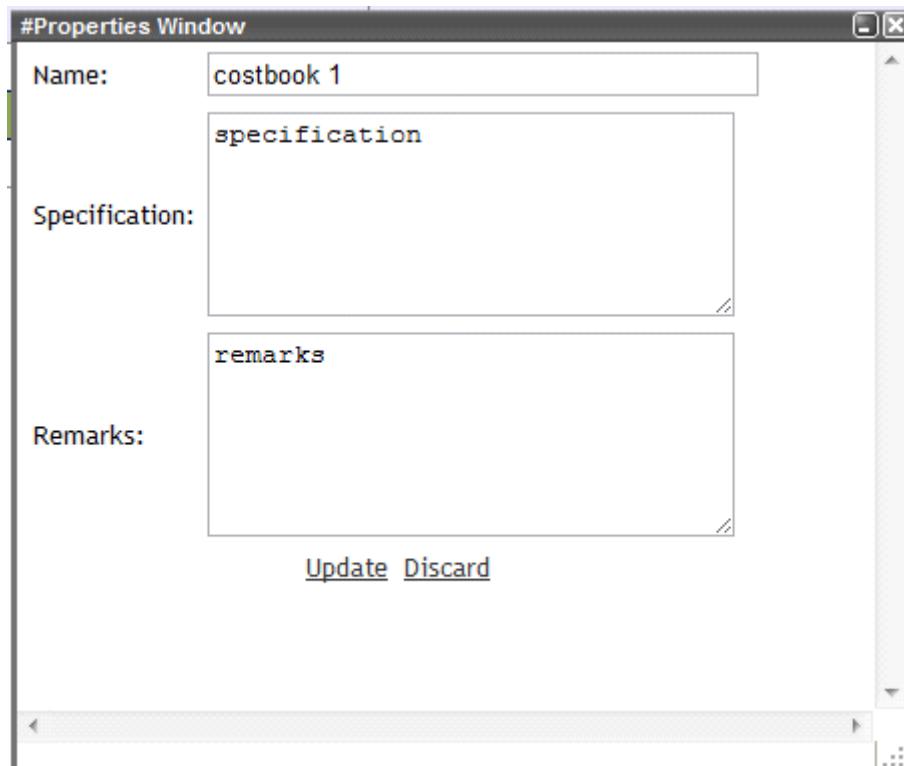

A new properties window will be displayed inside the workspace. Fill-in the details and click on "Add" option at the bottom of the properties window to add a new item into the database. Click on "Discard" to close the properties window without making any changes.

### 3.3.3 Editing an existing Category or Cost-Book

Select a category or cost-book through the radio-button, and then click on "Edit" option inside the workspace menu. Alternatively right click over an item and select Modify->Edit from the context menu.

**Fig 3-14-a:** Editing a category or cost-book

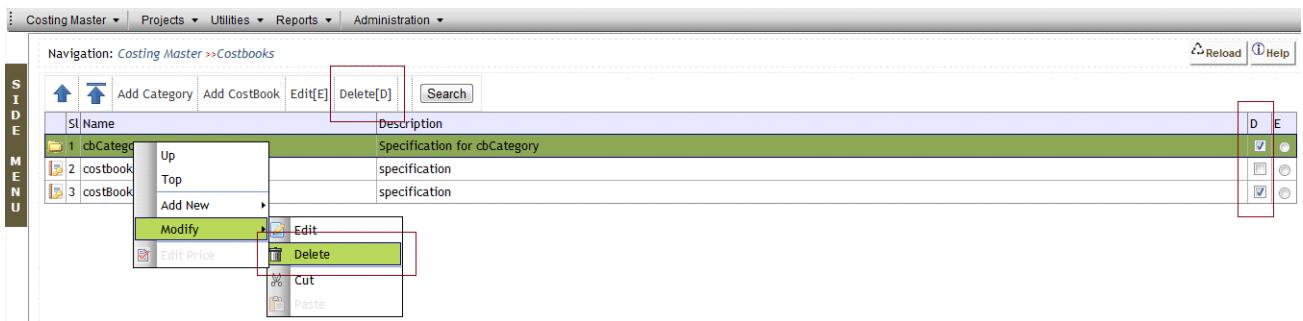

**Fig 3-14-b:** Properties window showing details of the selected cost-book

A properties window containing current details of the selected item will be displayed inside the workspace. Make requisite changes and click on "Update" to commit the changes into the database. Click on "Discard" to close the window and discard the changes.

### 3.3.4 Deleting an existing Category or Cost-Book

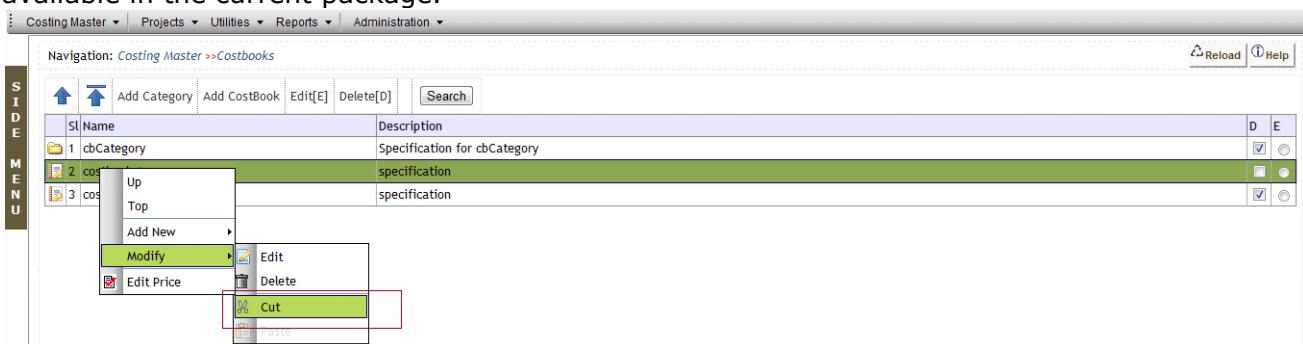

Select at least one item from the list through checkboxes and then click on "Delete" inside the workspace menu. An item may be deleted from the list by right clicking over it and selecting Modify->Delete from the context menu. Please note that selected items and associated records will be permanently deleted from the database.

**Fig 3-15:** Deleting items from the database

### 3.3.5 Moving an existing Category or Cost-Book

Right click over an item and select Modify->Cut to move the item. Navigate to destination category and select Modify->Paste from the context menu to complete the request. "Paste" option in the context menu is available only if an item has already been selected to be moved or copied. "Copy" option is not available in the current package.

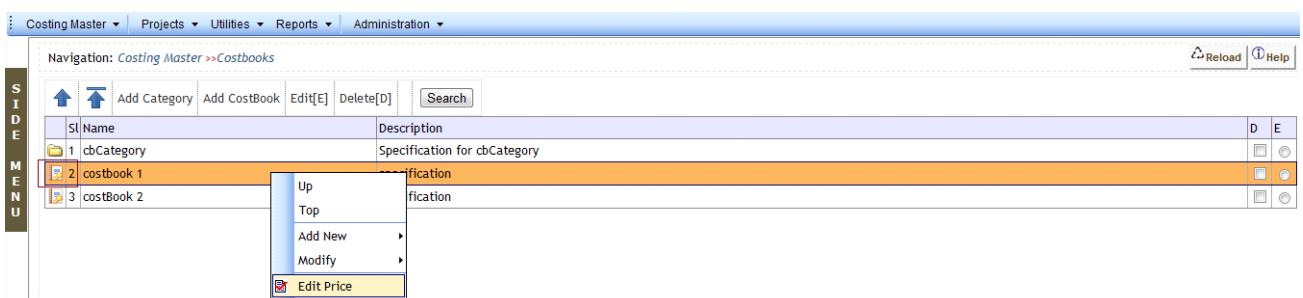

**Fig 3-16:** Moving items to another category

### 3.3.6 Analysis of Rates

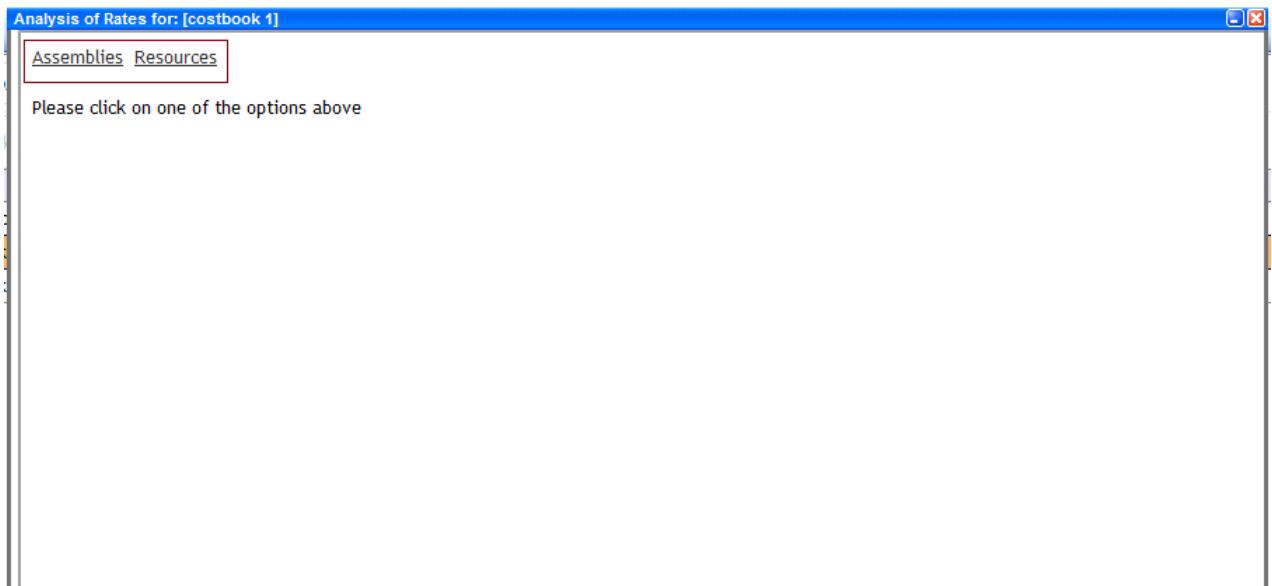

Unit-rate of an assembly is derived from:

- Resources (material, manpower, equipments) required to execute a fixed amount of specific work
- Overheads (e.g. water charges, profit) for a fixed amount of specific work

Click over the "cost-book icon" or right click over a cost-book and select "Edit Price" from the context menu to display the "Analysis of Rates" window.

**Fig 3-17-a:** Opening the Analysis of Rates window for a cost-book

**Fig 3-17-b:** Analysis of Rates window for a selected cost-book (name of the cost-book is displayed in the title-bar)

Click over "Assemblies" option to populate the list of assemblies (with cost-book defined unit-rates). Click over "Resources" option to populate the list of resources which have been used to prepare "Analysis of Rates" in the selected cost-book.

### 3.3.6.1 Viewing Analysis of Rate of an Assembly

Analysis of Rates for: [costbook 1]			
<a href="#">Assemblies</a> <a href="#">Resources</a>			
<input type="button" value="Up"/> <input type="button" value="Up"/>		Enter keyword:	<input type="button" value="GO"/>
Sl	Name	Description	Price
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.	<input type="text" value="4320.45765"/> <input type="text" value="4147.4/cum"/>
2	1.2	Providing concrete.	<input type="text" value="54.5629"/> <input type="text" value="54.55/cum"/>

7	7	Carriage of cement	0.41	47.29/Tonne	19.39	<input type="checkbox"/>

Fig 3-21-a: Adding a new resource

The screenshot shows the software's resource selection and analysis feature. On the left, the 'Add Materials' dialog lists various resources with their descriptions and unit prices. Some items have green checkmarks in the 'Selected' column, while others have red Xs. A red box highlights the 'Selected' column header and one of the checked items. On the right, the 'Analysis for 1 cum Change' table displays the total cost for each resource.

Resource	Unit Price	Total Cost
00/Cum	399.00	
00/Cum	196.00	
21/Cum	45.23	
00/Cum	255.00	
21/Cum	22.61	
00/Tonne	1,845.00	
29/Tonne	19.39	
0/Kg	61.50	
00/Cum	200.00	
0/Cum	80.00	
6.55/Day	24.91	
5.25/Day	270.50	
8.45/Day	124.60	

**Fig 3-21-b:** Selecting resources and adding them into analysis table

Add resources into the table by clicking on the "Tick icon ". Please note that if unit-price of a resource is not defined in the cost-book, standard unit-price will be used (will be displayed in red-font inside the selection window). Each resource can only be added once.

The screenshot shows the 'Analysis for 1 cum Change' table with resource amounts entered. The 'Carriage of diesel' and 'Hire charges' rows have been modified. The 'Carriage of diesel' row now has a value of '2.5\*3' and a unit price of '5.32/Quintal'. The 'Hire charges' row now has a value of '0' and a unit price of '1000/Day'. Both rows have green checkmarks in the 'Selected' column.

Resource	Unit Price	Total Cost
00/Cum	399.00	
00/Cum	196.00	
21/Cum	45.23	
00/Cum	255.00	
21/Cum	22.61	
00/Tonne	1,845.00	
29/Tonne	19.39	
0/Kg	61.50	
00/Cum	200.00	
0/Cum	80.00	
6.55/Day	24.91	
5.25/Day	270.50	
8.45/Day	124.60	

**Fig 3-21-c:** Entering amount of resource

Newly added resources will be displayed at the bottom of the list, fill-in the amount (arithmetic expression can be used) for the current basis (read section 3.3.6.2), and click on the "Tick icon to finalize. Click on "Cross icon to discard.

**Adding a new Overhead:** click on "Add New" in the top menu (user must be inside the Overheads section), or select "Add Overhead" from the context menu. A blank row containing editable fields will be displayed at the bottom of the table.

The screenshot shows the 'Analysis for 1 cum Change' table with a new overhead item added. The item 'Add 1% water charges' has a value of '3570.75\*1/100' and a total cost of '35.71'. A context menu is open over this row, showing options: 'Add Overhead', 'Import', 'Edit', and 'Delete'. The 'Edit' option is highlighted.

Resource	Unit Price	Total Cost
00/Cum	399.00	
00/Cum	196.00	
21/Cum	45.23	
00/Cum	255.00	
21/Cum	22.61

Fill description and amount and click over "Tick icon " to add the new overhead into database. Click on "Cross icon " to discard.

### 3.3.6.4 Importing Analysis of Rate

Analysis of Rate of an assembly can be imported from other cost-books (if Analysis of rate of the selected assembly is defined in other cost-books).

Analysis of rate of an assembly can be derived from other assemblies. Please note that the existing analysis of rate will be discarded.

**Importing from other Cost-Book:** Click on "Import[CostBook]" in the top menu, or right click inside the analysis table and select Import-> From CostBook from the context menu.

Analysis of Rate for: 1.1

Import Analysis		
<input type="button" value="Up"/>	<input type="button" value="Up"/>	Enter keyword:
<input type="button" value="Import"/>	<input type="button" value="Delete"/>	<input type="button" value="GO"/>

**Fig 3-23-b:** Cost-book selection window

Select a cost-book by clicking over the "Tick icon " . All resources and overheads defined for the current assembly (for which analysis of rate is being prepared) will

be imported from the selected cost-book.

**Deriving Analysis of Rate:** Analysis of rate of an assembly may be derived from other assemblies provided that their analysis of rates exists in the current cost-book. Click on "Import[Assemblies]" in the top menu, or right click inside the analysis table and select Import->From Assemblies from the context menu.

**Fig 3-24-a:** Deriving the analysis of rate from other assemblies

A new sub-window will appear displaying the list of all assemblies whose analysis of rates has been defined in the current cost-book.

The screenshot shows a sub-window titled 'Import from Assemblies'. It has a 'Filter:' input field and an 'Export' button. The main area is a table with columns 'SL', 'Name', 'Description', 'Price', and 'Amount'. Seven rows are listed, each with a checkbox in the 'Amount' column. Row 1.2 has a checked box with '5 \*1' entered. Row 2.1 has a checked box with '4 \*100' entered. Row 3.1 has an unchecked box with '-'. Other rows have unchecked boxes and empty or '-' entries in the amount column.

SL	Name	Description	Price	Amount
1	1.2	Providing M-30 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.	54.5629/cum	5 *1
2	1.3	SCREED CONCRETE	0/cum	- *1
3	1.4	1:4:8 (1 Cement : 4 coarse sand :8 graded stone aggregate 40 mm nominal size)	2310.0504/cum	- *1
4	1.5	1:3:6(1 Cement :3 coarse sand :6 graded stone aggregate 20 mm nominal size)	2791.0574/cum	- *1
5	1.6	Grouting	0/cum	- *1
6	2.1	Thermo-Mechanically Treated bars	42.7242545/kg	4 *100
7	3.1	White washing with lime to give an even shade	67.505/sqm	-

**Fig 3-24-b:** Selecting assemblies

Select assemblies through checkboxes and fill volumes inside the text-boxes. Numerical figure after each textbox will be multiplied to the volume entered inside the text-box. E.g. in **figure 3-24-b** analysis of rate for [4\*100=400kg] of the assembly named 2.1 will be combined with the analysis of rate for [5\*1=5cum] of the assembly named 1.2. Volume multipliers are the basis (read section 3.3.6.2) of the selected assemblies.

Click on "Export" at the top of the sub-window to finish.

7	2209	Carriage of cement	Tonne	47.29	✓	✗
8	7318	Plasticizer 0.50% of cement.	Kg	30	✓	✗
9	0004	Production cost of concrete by batch mix plant.	Cum	200	✓	✗
10	0009	Pumping charge of concrete.	Cum	80	✓	✗

**Fig 3-27-b:** Main internal window showing the list of resources (cost-book's name is displayed over the title-bar)

After changing the unit-price of a resource, click on the "Tick icon ✓" to commit the change. Click on "Cross icon ✗" to roll-back. When unit-price of a resource is updated, unit rates of all assemblies dependent on that particular resource are updated automatically.

## 4 Projects

**Projects** module has been designed to assist estimators and engineers in preparation of accurate estimates.

**Fig 4-1:** Projects menu in the main menu-bar

### Getting Started

Expand the "Projects" menu in the main menu-bar to access following modules:

**Definitive Estimate:** Definitive Estimate module provides a set of tools for generating accurate cost-sheets, material takeoffs and Bill of Quantity for construction projects.

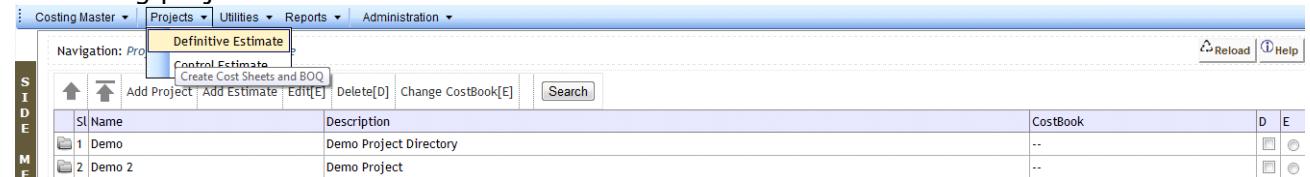

**Control Estimate:** Control Estimate module is an extension of Definitive Estimate module. This module enables engineers and project managers to gain full control over three basic variables that affect a construction project and its profitability: Schedule, Cost and Resources. This Module can be used for collecting as-built data, for generating Projections and for Audit & Reconciliation.

### 4.1 Definitive Estimate

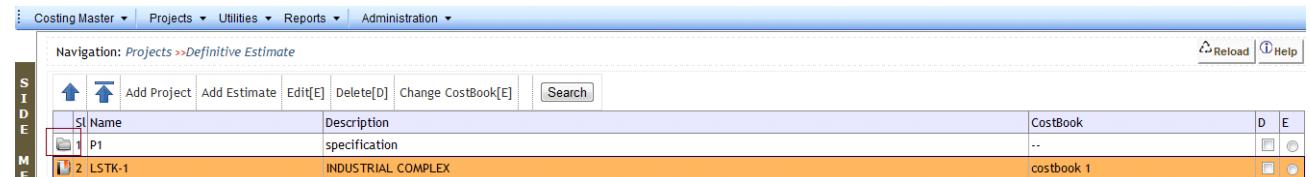

This tutorial aims at familiarizing users with the "Definitive Estimate" module. Main function of this module is preparation of detailed Cost-Sheets and Material takeoffs.

#### 4.1.1 Moving Around

Select Projects-> **Definitive Estimate** from the main menu-bar to display the list of existing projects and estimates.

**Fig 4-2-a:** Loading the Projects module

**Fig 4-2-b:** Exploring the content-table

Estimates may be arranged in Project directories. Click over the "directory icon" of a listed Project to access its contents. Click on "up icon" to move back to parent Project directory. Click on "top icon" to move to the top level.

#### 4.1.2 Adding a new Project or Estimate

**Adding a new Project:** Click on "Add New" link inside the workspace menu, or right click inside the content-table and select Add New-> New Project from the context menu.

**Adding a new Estimate:** To add a new estimate into the database click on "Add Estimate" link in the workspace menu. Alternatively, right click inside the content-table and select Add New->New Estimate from the context-menu.

Fig 4-3-a: Adding a new project or estimate

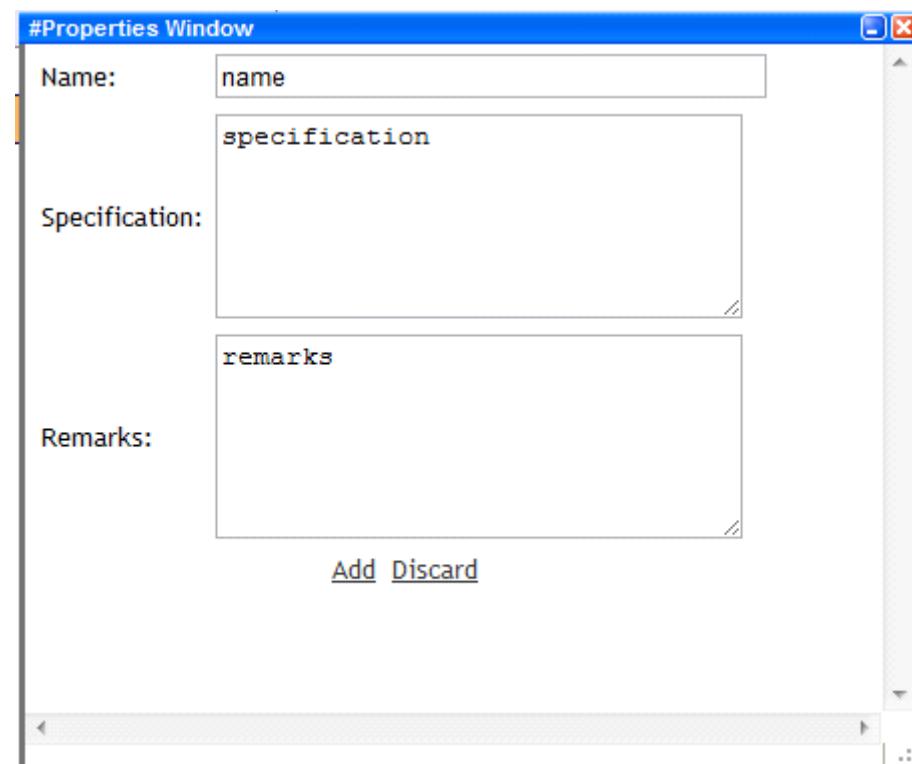

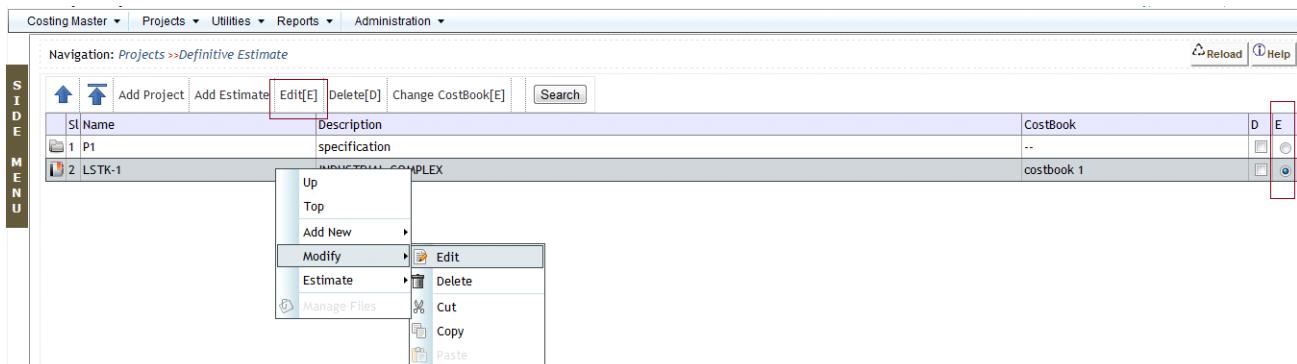

Fig 4-3-b: Properties window for new project or estimate

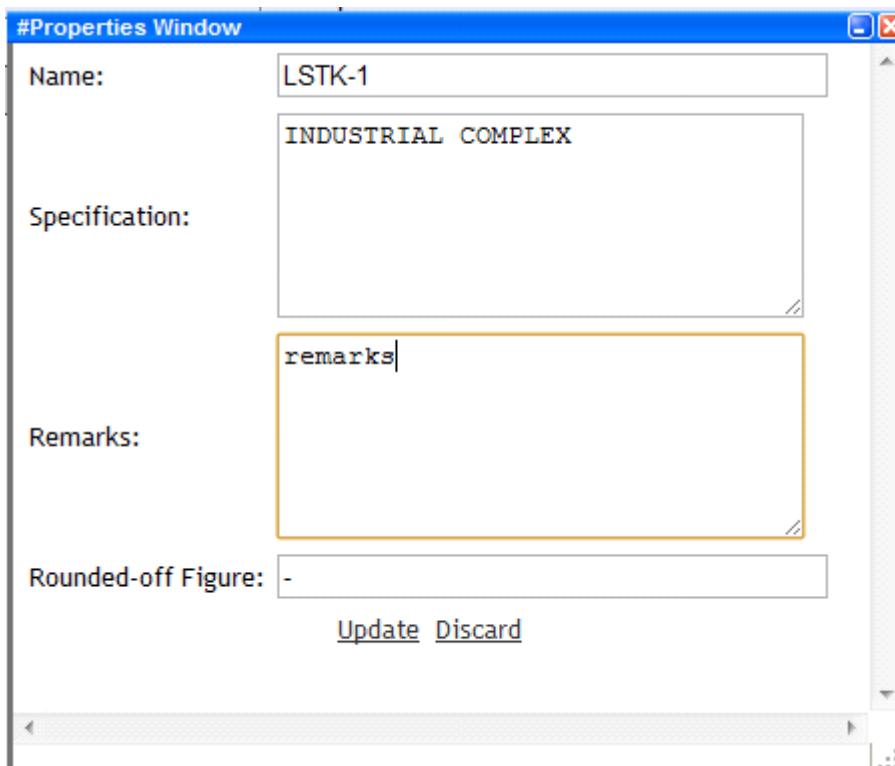

A properties window will appear inside the workspace. Fill-in the details and click on "Add" inside the properties window to add a new item. Click on "Discard" to close the window discarding the changes.

#### 4.1.3 Editing an existing project or estimate

Select a project/estimate through radio-button and then click on "Edit" option inside the workspace menu. Alternatively right click over an item and then select Modify->Edit from the context menu.

**Fig 4-4-a:** Editing a project or estimate

**Fig 4-4-a:** Properties window showing the details of an estimate

A properties window containing current details of the selected project/estimate will be displayed inside the workspace. Make changes and click on "Update" to commit the changes back into the database. Click on "Discard" to close the window discarding all changes.

#### 4.1.4 Deleting an existing Project or Estimate

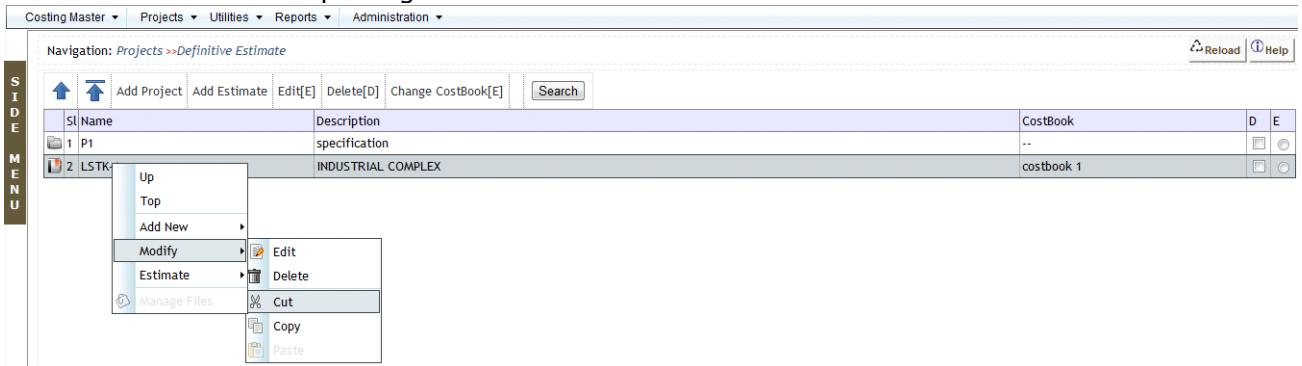

Select one or more items from the content-table through checkboxes and then click on "Delete" in the workspace menu. An item can be deleted by right clicking over it and then selecting Modify->Delete from context menu. Please note that selected items and associated records will be permanently deleted from the database.

**Fig 4-5:** Deleting items

#### 4.1.5 Moving an existing Project or Estimate

Right click over a project/estimate and select Modify->Cut to move the item, select Modify->Copy to copy. Navigate to destination project directory and select Modify->Paste from the context menu to complete the request. "Paste" option in the context menu is available only if an item has already been selected to be moved or copied. Please note that option to "Copy" a project directory is not available in the current package.

**Fig 4-6:** Copying or moving items (only estimates can be copied)

#### 4.1.6 Preparing Cost-Sheet

A project may be divided into sub-projects and each sub project may contain several estimates. Each estimate contains a detailed cost-sheet. Each Cost Sheet contains a list of jobs and their dimensions as per the drawings. All jobs of the same nature are grouped together under one assembly.

**Fig 4-7-a:** Opening the cost-sheet window

Click over the "estimate icon" , or right click over an estimate and then select Estimate->Cost Sheet from the context menu to display the cost-sheet window.

Bill for Estimate: [LSTK-1]						
Add Assembly		Delete[D]	Add Job[E]	Filter:		
Sl	Name	Description	Price	Premium(%)	D	E
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.	4320.45765/cum	0	✓ X	<input type="checkbox"/>
2	1.2	Providing M-30 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.	54.5629/cum	0	✓ X	<input type="checkbox"/>
3	1.3	SCREED CONCRETE	0/cum	0	✓ X	<input type="checkbox"/>
4	1.4	1:4:8 (1 Cement : 4 coarse sand :8 graded stone aggregate 40 mm nominal size)	2310.0504/cum	0	✓ X	<input type="checkbox"/>
5	1.5	1:3:6(1 Cement :3 coarse sand :6 graded stone aggregate 20 mm nominal size)	2791.0574/cum	0	✓ X	<input type="checkbox"/>
6	1.6	Grouting	0/cum	0	✓ X	<input type="checkbox"/>
7	2.1	Thermo-Mechanically Treated bars	42.7242545/kg	0	✓ X	<input type="checkbox"/>
8	3.1	White washing with lime to give an even shade (three coats)	67.505/sqm	0	✓ X	<input type="checkbox"/>
9	3.2	Painting with acid proof paint of approved brand and manufacture of required colour to give an even shade (three coats on new work)	324.009/sqm	0	✓ X	<input type="checkbox"/>
10	3.3	Providing and laying damp-proof course 40mm thick with cement concrete 1:2:4 (1 cement :2 coarse sand :4 graded stone aggregate 12.5mm nominal size)	138.44/sqm	0	✓ X	<input type="checkbox"/>
11	4.1	Strutural steel work in single section fixed with or without connecting plate including cutting ,hosting,fixing in position and applying a priming coat of approved steel primer all complete.	40.8996545/kg	0	✓ X	<input type="checkbox"/>

**Fig 4-7-b:** Screenshot of a Cost Sheet displaying the list of Assemblies. Assemblies are used to group together all jobs of similar nature (name of the estimate is displayed in the title bar)

#### 4.1.6.1 Unit Rates of Assemblies

If no cost-book is associated with an estimate (this is default), standard unit-rates of assemblies will be used in the cost-sheet. Select an estimate through radio-button and then click on "Change CostBook" link inside the internal workspace menu, or right click over an estimate and then select Estimate->Change CostBook from the context menu.

**Fig 4-8-a:** Selecting a cost-book

#CostBook			
		Enter keyword:	GO
Sl	Name	Description	
1	cbCategory	Specification for cbCategory	
2	costbook 1	specification	✓
3	costBook 2	specification	✓

**Fig 4-8-b:** cost-book selection window

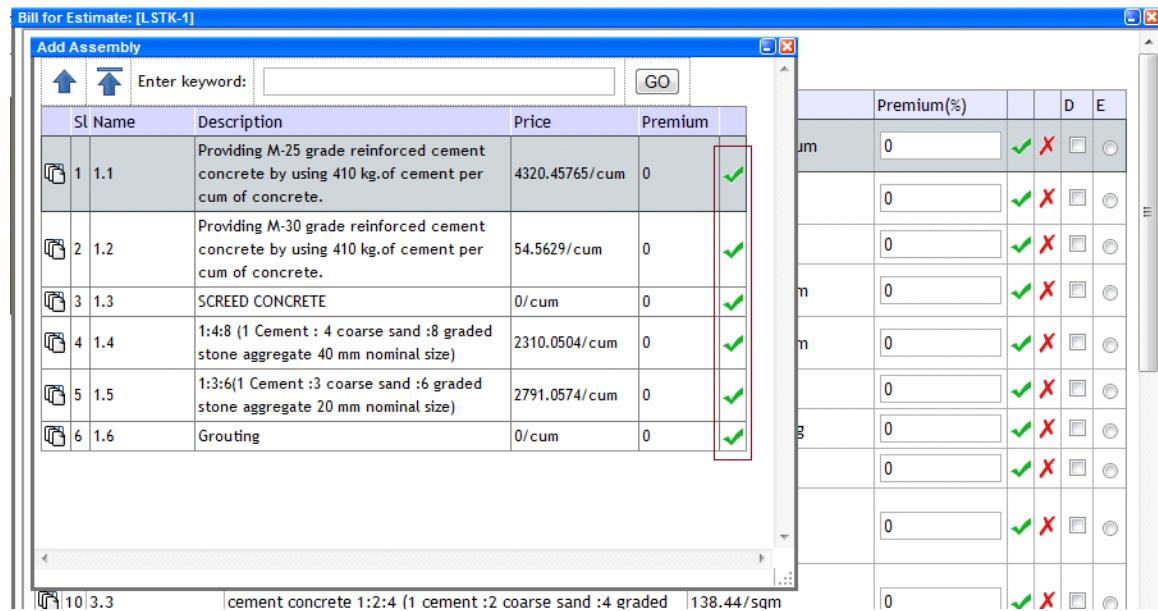

A window containing the list of existing cost-books will be displayed. Click over the "Tick icon" on the left of a cost-book to associate it with the selected Estimate. Please note that if unit-rate of an assembly is not defined in the cost-book, then standard unit-rate of that assembly will be used instead.

#### 4.1.6.2 Adding Assemblies into the Cost-Sheet

Bill for Estimate: [LSTK-1]							
Add Assembly		Delete[D]	Add Job[E]	Filter:			
Sl	Name	Description		Price	Premium(%)	D	E
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg.	concrete.	4320.45765/cum	0	✓ X	□ ○
2	1.2	Providing M-25 grade reinforced cement concrete by using 410 kg.	concrete.	54.5629/cum	0	✓ X	□ ○
3	1.3	SCREED CONCRETE		0/cum	0	✓ X	□ ○
4	1.4	1:4:8 (1 Cement : 4 coarse sand :8 graded stone aggregate 40 mm nominal size)		2310.0504/cum	0	✓ X	□ ○

**Fig 4-9-a:** adding new assembly

Click on "Add Assembly" option inside the top menu, or select "Add Assembly" from the context menu.

**Fig 4-9-b:** Assembly selection window

Add an assembly into the cost-sheet by clicking over the "Tick icon ". Selected assembly will be added at the bottom of the cost-sheet.

Premium: To adjust the premium amount (% over the unit-rate) of an assembly, edit the amount inside the premium text-box and then click over "Tick icon to update the database. Click over "Cross icon to roll-back.

Add Assembly	Delete[D]	Add Job[E]	Filter:			
Sl. No.	Name	Description	Price	Premium(%)	D	E
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.	4320.45765/cum	250		
2	1.2	Providing M-30 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.	54.5629/cum	0		
3	1.3	SCREED CONCRETE	0/cum	0

#### 4.1.8 Managing overheads

Costing Master ▾ Projects ▾ Utilities ▾ Reports ▾ Administration ▾

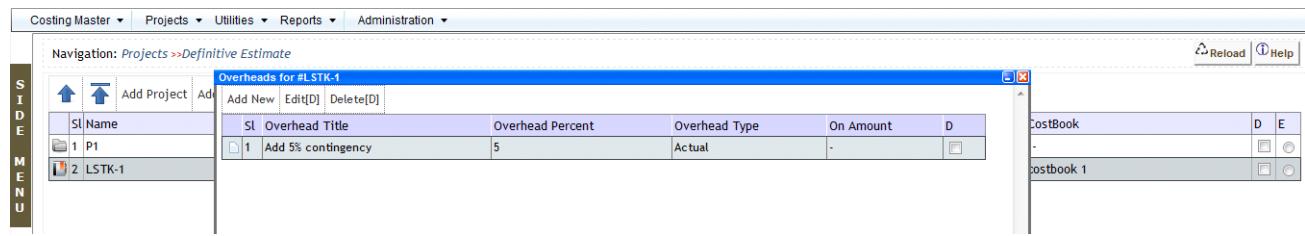

Navigation: Projects >>Definitive Estimate

Add Project Add Estimate Edit[E] Delete[D] Change CostBook[E] Search

SIDE MENU	SL	Name	Description	CostBook	D E
	1	P1	specification	..	<input type="checkbox"/> <input checked="" type="radio"/>
	2	LSTK-1	Up Top Add New Modify Estimate Manage Files Change CostBook Cost Sheet Overheads	costbook 1	<input type="checkbox"/> <input checked="" type="radio"/>

Fig 4-15-a: Opening overheads window

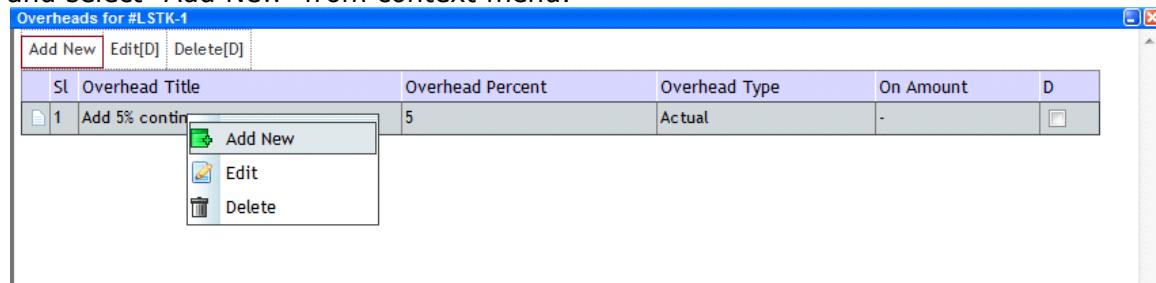

Right click over an estimate and select Estimate-> Overheads from the context menu.

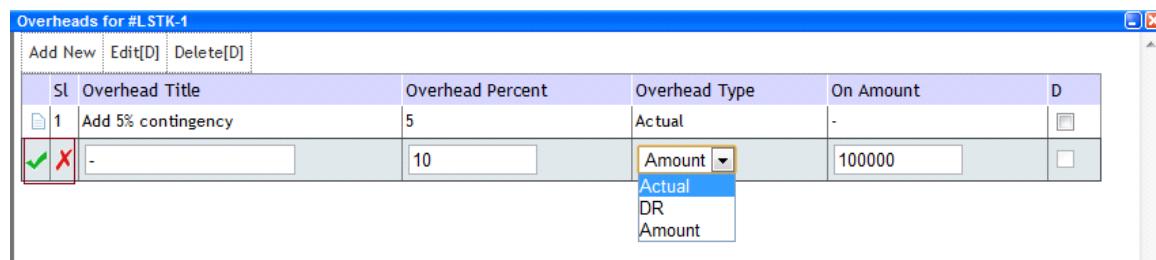

**Fig 4-15-b:** Screenshot of the overheads window

#### 4.1.8.1 Adding new overheads

Click on "Add New" in the internal menu, or right click over the overheads table and select "Add New" from context menu.

**Fig 4-16-a:** Adding new overhead

**Fig 4-16-b:** Screenshot showing blank row for adding a new overhead

A new empty row with editable text boxes will be added at the bottom of the list.

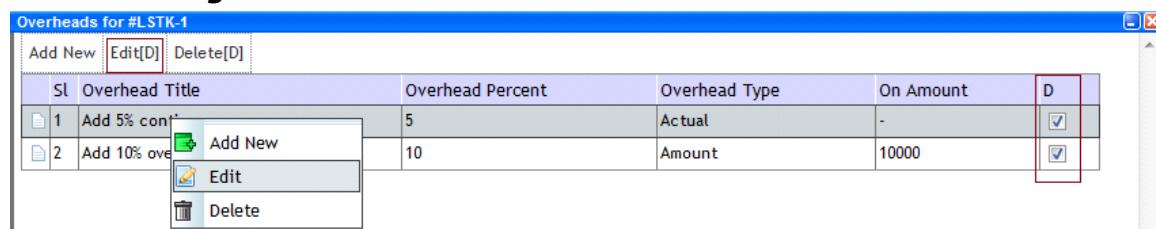

**Overhead types:** Overheads are always defined in %.

Actual: Overhead defined as % over the amount derived from the cost-sheet.

Derived: Overhead defined as % over the amount derived till the point (cost-sheet+overheads).

Amount: Overhead defined as % over a fixed amount (filled in "On Amount" text-box).

#### 4.1.8.2 Editing Overheads

**Fig 4-17-a:** Editing an overhead

Select one or more overheads and click on "Edit" in the top menu. Alternatively, right click over an overhead and select "Edit" from the context menu.

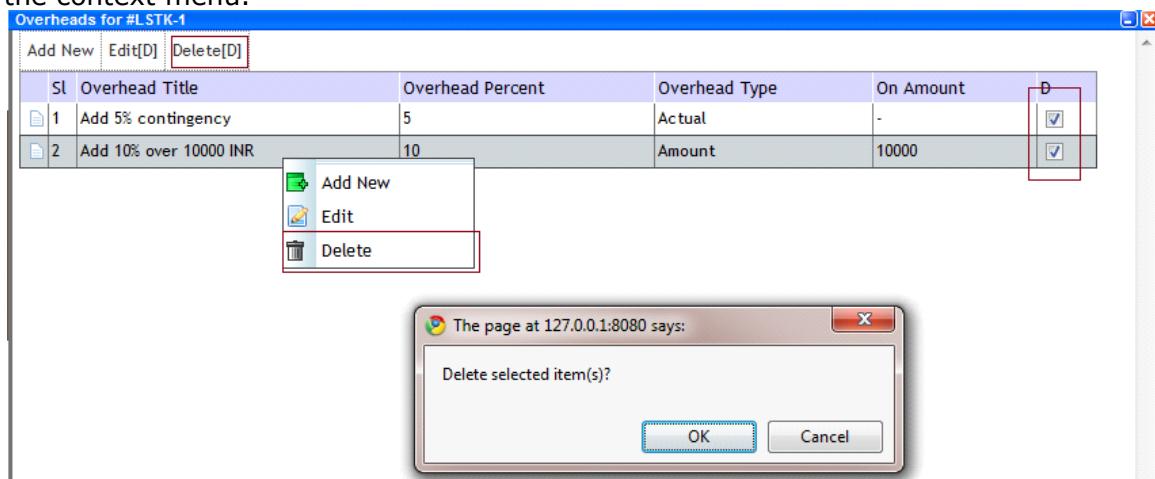

Overheads for #LSTK-1					
	Add New	Edit[D]	Delete[D]		
Sl	Overhead Title	Overhead Percent	Overhead Type	On Amount	D
✓ X	Add 5% contingency	5	Actual		
✓ X	Add 10% over 10000 INR	10	Amount	10000	

**Fig 4-17-b:** Screenshot showing overheads being edited

Fields in the selected rows will be replaced by editable boxes. Click on "Tick icon ✓" to commit the changes into the database. Click on "Cross icon X" to discard the changes.

#### 4.1.8.3 Deleting Overheads

Select one or more overheads through checkboxes and then click on "Delete" link in the top menu. Alternatively right click on an overhead and select "Delete" from the context menu.

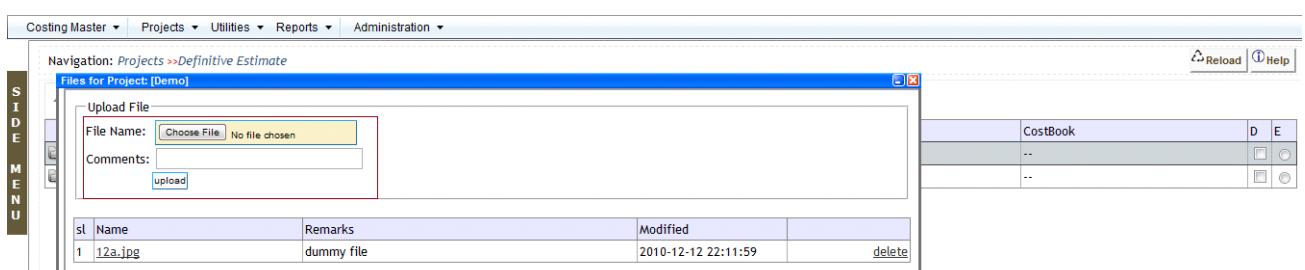

**Fig 4-18:** Deleting overheads

#### 4.1.9 Managing References

External files can be uploaded and attached with the project directories. Right click over a project and select "Manage Files" from the context menu.

**Fig 4-19-a:** Opening references window

**Fig 4-19-b:** Screenshot of references window

#### **4.1.9.1 Uploading a new Reference**

Click on "Choose File" button, and select a file. Add a comment and click on upload. Please note that maximum size of the file is limited by "**max\_allowed\_packet**" configuration of the database server (default is **1048576 bytes**) in case of MYSQL. Newly added file will be listed in table.

#### **4.1.9.2 Deleting a Reference**

The screenshot shows a window titled 'Files for Project: [Demo]'. At the top, there is a form with fields for 'File Name' (containing 'Choose File No file chosen'), 'Comments' (empty), and a 'upload' button. Below this is a table with columns 'sl', 'Name', 'Remarks', and 'Modified'. Two rows are listed:

sl	Name	Remarks	Modified	
1	12a.jpg	dummy file	2010-12-12 22:11:59	<a href="#">delete</a>
2	ggfghh.png	dummy image	2010-12-12 22:21:21	<a href="#">delete</a>

**Fig 4-20:** Deleting references

Click over "delete" on the left of a listed reference to delete it.

#### **4.1.9.3 Viewing a Reference**

Click on the file-name of a listed reference to download/open the referenced file on local machine.

### **4.2 Control Estimate**

This tutorial presents a basic overview of the **Control Estimate** module.

#### **4.2.1 Moving Around**

Select Projects-> **Control Estimate** from the main menu-bar to display the list of existing projects and control estimates.

The screenshot shows the 'Costing Master' application with the 'Projects' tab selected. In the 'Navigation' bar, 'Control Estimate' is highlighted. Below is a table with columns 'Sl' and 'Name'. Two rows are listed:

Sl	Name	Description	D	E
1	DemoProject	specification for Demo Project	<input type="checkbox"/>	<input checked="" type="radio"/>
2	DemoEstimate	Demo Estimate	<input type="checkbox"/>	<input checked="" type="radio"/>

**Fig 4-21-a:** Accessing Control Estimate module

The screenshot shows the 'Costing Master' application with the 'Projects' tab selected. In the 'Navigation' bar, 'Control Estimate' is highlighted. Below is a table with columns 'Sl' and 'Name'. Two rows are listed:

Sl	Name	Description	D	E
1	DemoProject	specification for Demo Project	<input checked="" type="checkbox"/>	<input type="radio"/>
2	DemoEstimate	Demo Estimate	<input type="checkbox"/>	<input checked="" type="radio"/>

**Fig 4-21-b:** Moving around content table

Control Estimates may be arranged in project directories. Click over the "directory icon" of a listed project to view its contents. Click on "up icon" to move back to the parent Project directory. Click on "top icon" to move to the top level.

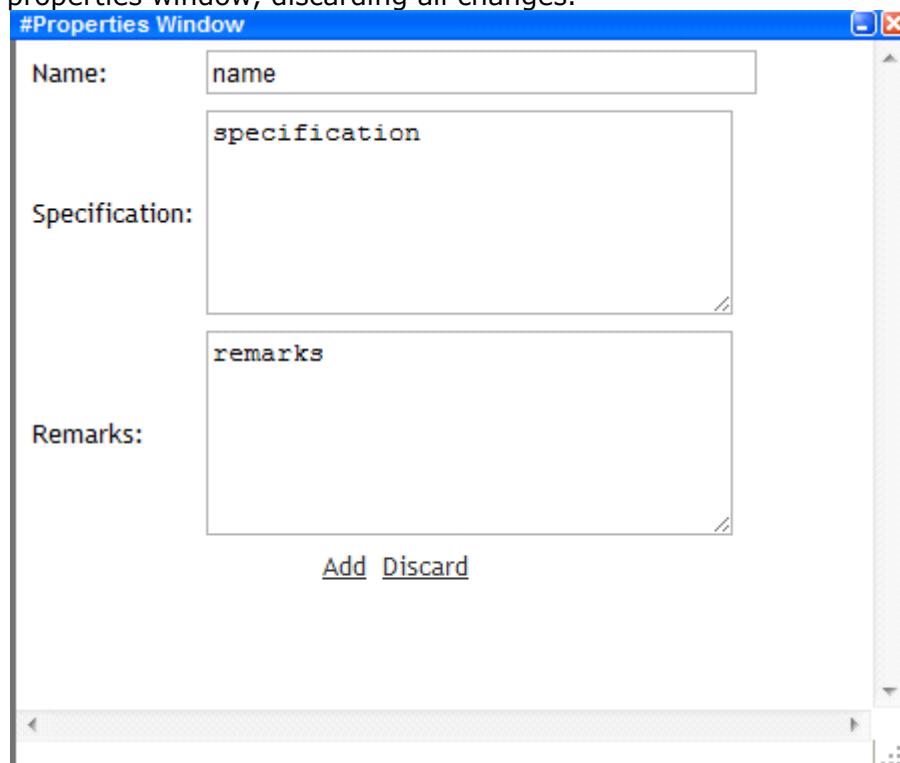

#### 4.2.2 Adding a new Project or Estimate

**Adding a new Project:** Click on "Add Project" option inside the workspace menu, or right click over the content-table and select Add New->New Project from context menu.

**Fig 4-22-a:** Adding new project or estimate

Fill in the details and click on "Add" to finalize. Click on "Discard" to close the properties window, discarding all changes.

**Fig 4-22-b:** Properties window for adding a new project

**Adding a new Estimate:** Click on "Add Estimate" in the workspace menu, or right click inside the content-table and select Add New->New Estimate from context menu.

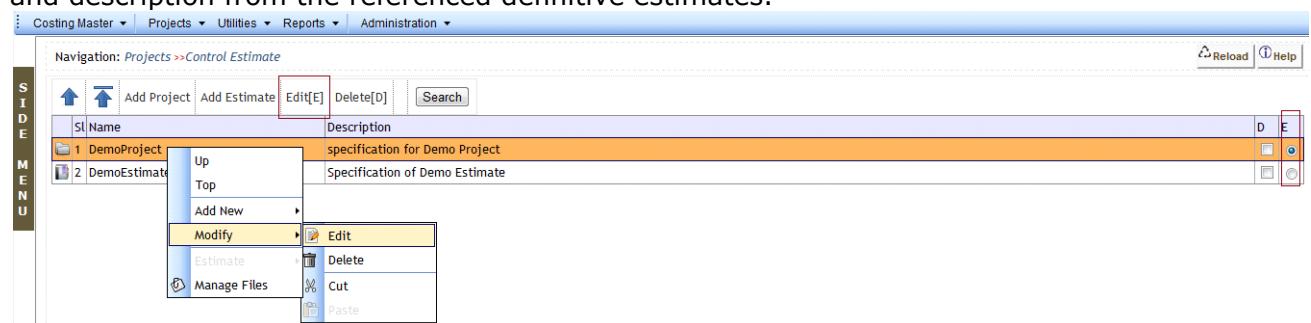

Select Estimate for Control					
	Sl Name	Description	CostBook	Select	
	1 P1	specification	--		
	2 LSTK-1	INDUSTRIAL COMPLEX	costbook 1	<input checked="" type="checkbox"/>	

**Fig 4-22-c:** Selecting a definitive estimate

Select a definitive estimate from the list by clicking over "Tick icon". Selected definitive estimate will be added as control estimate in database. If the referenced definitive estimate is deleted, the control estimate will be removed automatically.

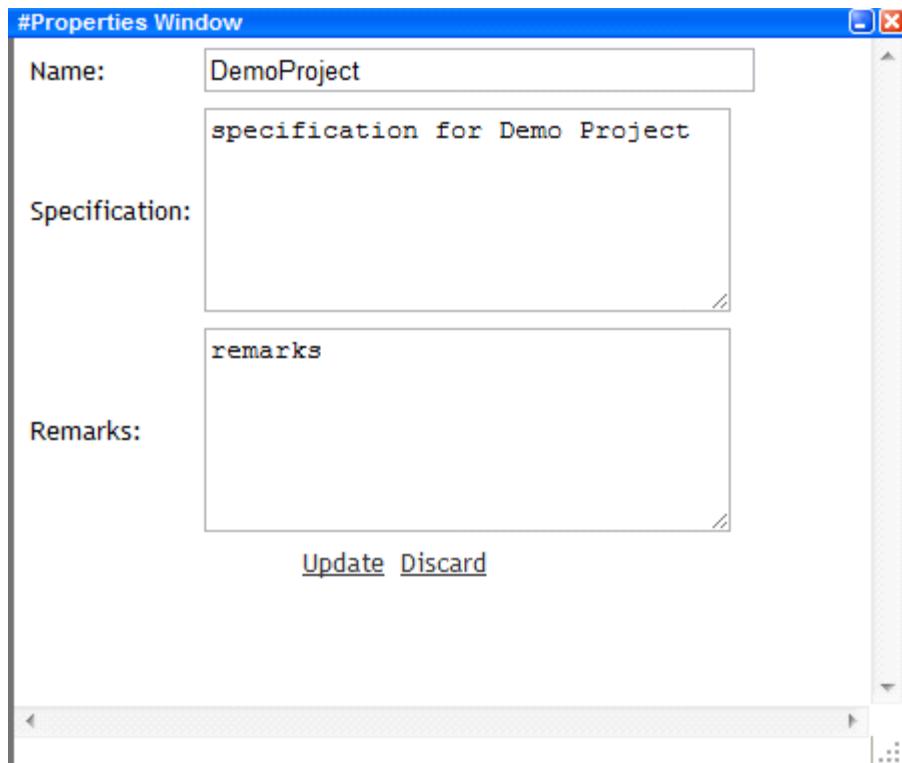

#### 4.2.3 Editing an existing Project or Estimate

Select a project through radio-button and then click on "Edit" inside the workspace menu. Alternatively right click over an item to be edited and then select Modify->Edit from the context menu. Control estimates inherit their name and description from the referenced definitive estimates.

**Fig 4-23-a:** Editing a project/estimate

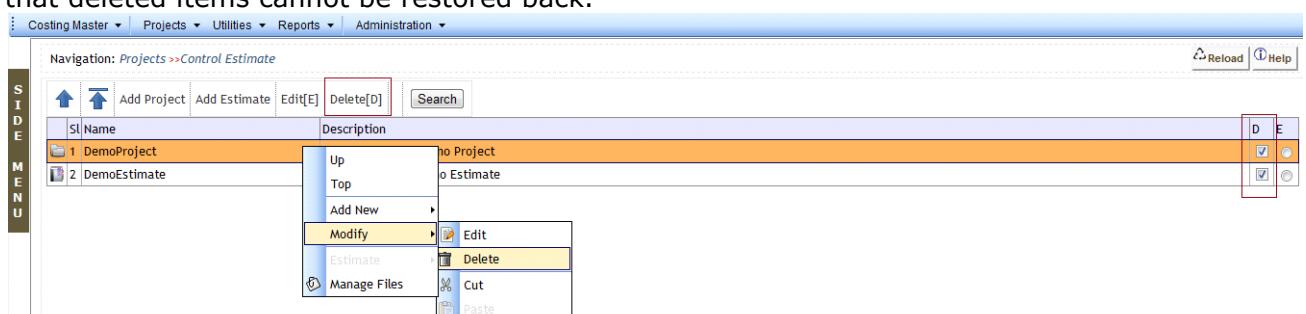

A properties sub-window containing current details of the selected item will be displayed inside the workspace. Click on "Update" to commit the changes into database. Click on "Discard" to close the sub-window discarding the changes.

**Fig 4-23-b:** Properties window showing the current details of a project

#### 4.2.4 Deleting an existing Project or Estimate

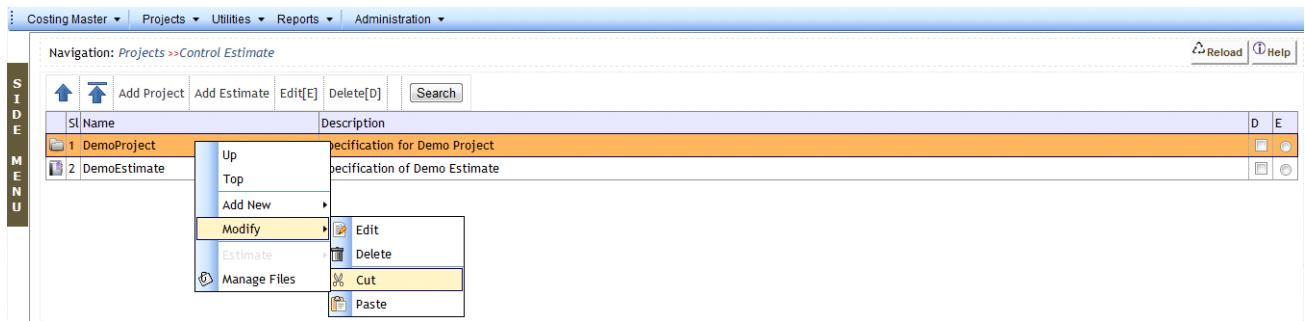

Select one or more items from the table through checkboxes and click on "Delete" inside the workspace menu. An item can be deleted from the list by right clicking over it and then selecting Modify->Delete from the context menu. Please note that deleted items cannot be restored back.

**Fig 4-24:** Deleting a project/estimate

#### 4.2.5 Moving an existing Project or Estimate

Right click over a project/estimate and select Modify->Cut to move the item, select Modify->Copy to copy. Navigate to destination project directory and select Modify->Paste from context menu to complete the request. "Paste" option in the context menu is available only if an item has already been selected to be moved or copied. Please note that option to "Copy" a project directory or a control-estimate is not available in the current package.

**Fig 4-25:** Moving a project/estimate

#### 4.2.6 Using Control Estimates

Control Estimates are used for scheduling the planned jobs, and for collecting as-built data from the sites.

##### 4.2.6.1 Managing Schedules

Click over "Control Estimate icon" on the left of a listed estimate, or right click over an estimate and select Estimate->Prepare Tasks from the context menu.

**Fig 4-26-a:** Managing jobs

A sub-window containing a list of assemblies and jobs (from the referenced definitive estimate) will be displayed inside the workspace.

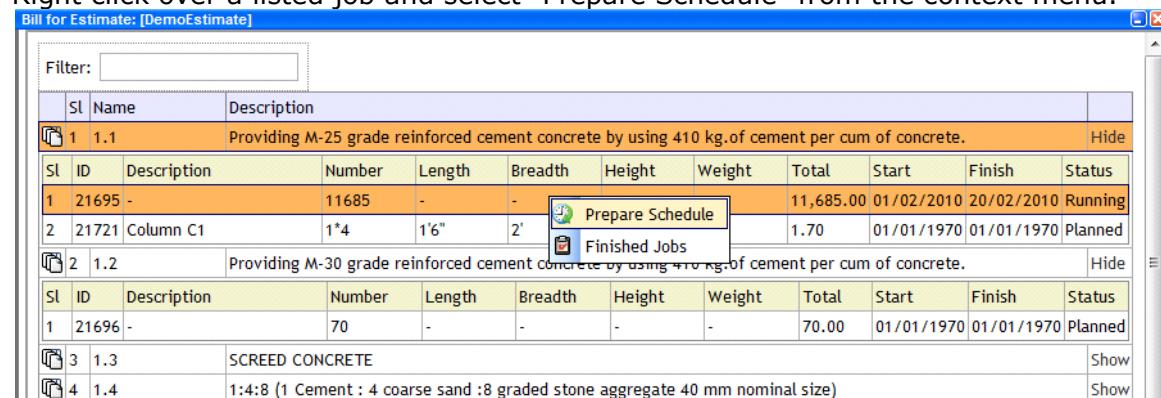

Bill for Estimate: [DemoEstimate]											
Filter:

8	3.1	White washing with lime to give an even shade (three coats)									
9	3.2	Painting with acid proof paint of approved brand and manufacture of required colour to give an even shade (three cots on new work)									
10	3.3	Providing and laying damp-proof course 40mm thick with cement concrete 1:2:4 (1 cement :2 coarse sand :4 graded stone aggregate 12.5mm nominal size)									
11	4.1	Strutural steel work in single section fixed with or without connecting plate including cutting ,hosting,fixing in position and applying a priming coat of approved steel primer all complete.									
12	4.2	25 mm thk Grating									

**Fig 4-26-b:** Screenshot of the jobs window for a selected control estimate (name of the estimate is shown in the title bar)

Like in case of definitive estimates, jobs of similar nature are grouped together under one assembly. To view the jobs grouped under an assembly, click on "Show". To hide the jobs click on "Hide".

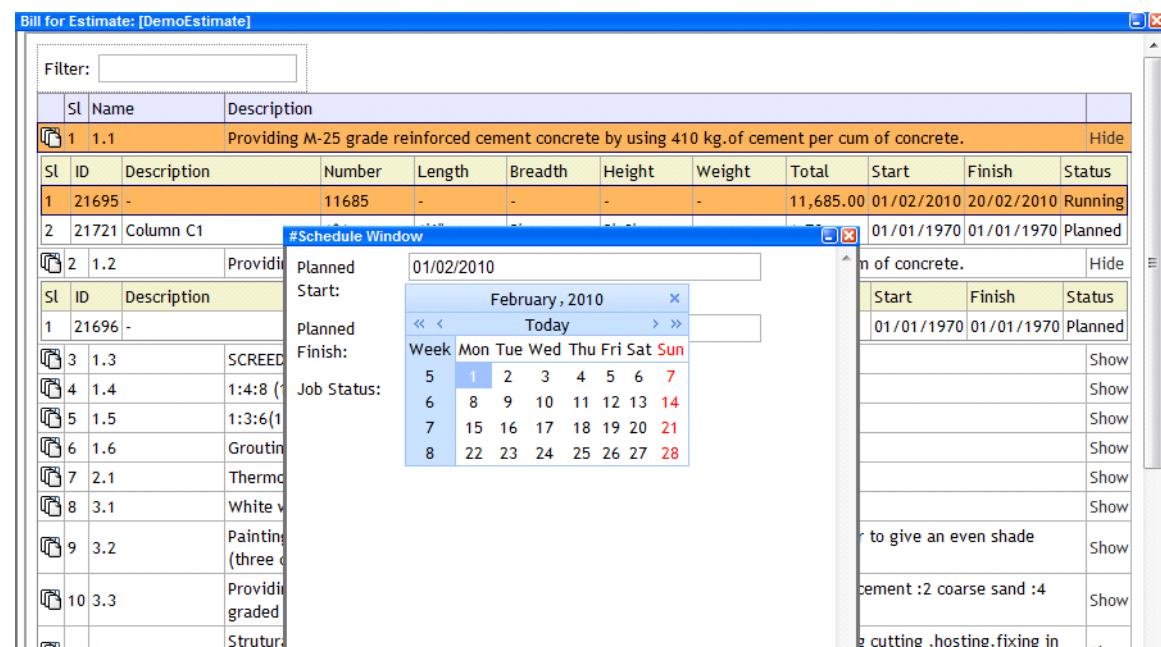

#### 4.2.6.2 Scheduling a job

Right click over a listed job and select "Prepare Schedule" from the context menu.

The screenshot shows a software window titled "Bill for Estimate: [DemoEstimate]". It displays a list of jobs in a table format. Job 1.1 is selected, and a context menu is open over it, with "Prepare Schedule" being the highlighted option. Other options in the menu include "Show" and "Hide". The table columns are: Sl, Name, Description, ID, Description, Number, Length, Breadth, Height, Weight, Total, Start, Finish, Status. Job 1.1 details: ID 21695, Description Column C1, Number 11685, Length -, Breadth -, Height -, Weight -, Total 11,685.00, Start 01/02/2010, Finish 20/02/2010, Status Running. Job 2.1.2 details: ID 21721, Description Column C1, Number 1\*4, Length 1'4", Breadth 2', Height -, Weight -, Total 1.70, Start 01/01/1970, Finish 01/01/1970, Status Planned.

**Fig 4-27-a:** Scheduling jobs

The screenshot shows the same software interface as Fig 4-27-a. A calendar dialog box is overlaid on the list of jobs, specifically for the "Start" date of Job 1.1. The calendar shows February 2010, with the date 01/02/2010 selected. The dialog has buttons for "Planned", "Start", and "Finish". The main list of jobs includes: Job 1.1 (Selected), Job 2.1.2 (Column C1), Job 3.1.3 (SCREED CONCRETE), Job 4.1.4 (1:4:8 (1 Cement : 4 coarse sand : 8 graded stone aggregate 40 mm nominal size)), Job 5.1.5 (1:3:6(1)), Job 6.1.6 (Grouting), Job 7.2.1 (Thermal), Job 8.3.1 (White v), Job 9.3.2 (Painting (three c)), Job 10.3.3 (Providing cement :2 coarse sand :4), and Job 11.4.1 (Structural cutting ,hosting,fixing in).

**Fig 4-27-b:** Picking start and end dates using the calendar

Bill for Estimate: [DemoEstimate]											
Filter: <input type="text"/>											
Sl	Name	Description									
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.

8	3.1	White wash									
9	3.2	Painting (three coats)									
10	3.3	Providing and laying graded sand									
11	4.1	Structural reinforcement positioning									

**Fig 4-27-c:** Setting job status

Select planned start and finish dates. Select status of the job (Planned, Running, Halted and Finished). Please note that as-built quantity can be viewed only for the jobs which are currently running. Click on "Update" to finalize the changes.

#### 4.2.6.3 Managing As-Built data

Right click over a running job and select Finished Jobs from the context menu.

Bill for Estimate: [DemoEstimate]											
Filter: <input type="text"/>											
Sl	Name	Description									
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.									
Sl	ID	Description	Number	Length	Breadth	Height	Weight	Total	Start	Finish	Status
1	21695 -	11685	-	-	-	-	-	11,685.00	01/02/2010	20/02/2010	Running

7	2.1	Thermo-Mechanically Treated bars									Show

**Fig 4-28-a:** Viewing as-built data for a running job

**Fig 4-28-b:** Screenshot showing As-built data for a running job

#### 4.2.6.4 Adding As-Built data

Click on "Add New" option inside sub-window's top menu, or right click inside the content-table and select "Add New" from context menu.

**Fig 4-29-a:** Adding a new as-built data

Empty rows containing editable fields will be added inside the table.

Fill description, dimensions, start and end dates and then click on "Tick icon" to add a finished work into the database.

**Fig 4-29-b:** Adding start and end dates to as-built data row

#### 4.2.6.5 Deleting As-Built data

**Fig 4-30:** Deleting as-built data

Select one or more items from the table, and click on "Delete" inside the top

menu to delete selected items from the database. Alternatively, right click over an item (to be deleted) and select "Delete" from the context menu.

#### 4.2.7 Managing References

External files may be attached (uploaded) to Project directories. Right click over a project and select Manage Files from the context menu to view the list of references.

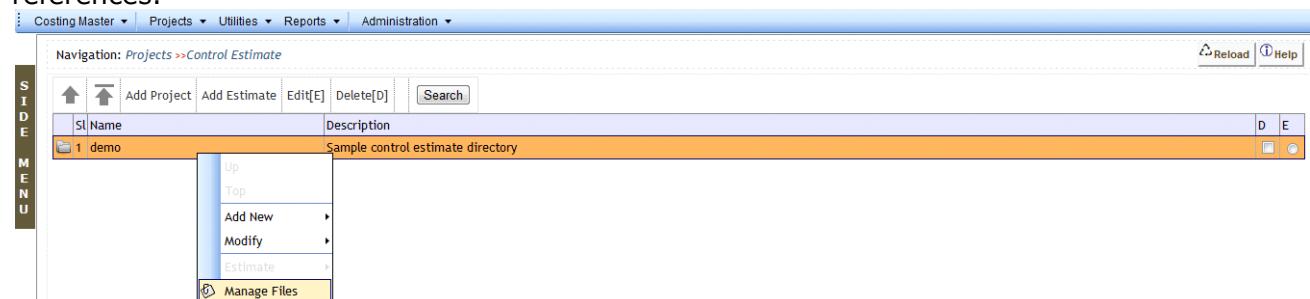

Fig 4-31-a: Opening references window

The screenshot shows a modal dialog box titled 'Files for Project: [demo]'. The dialog has a header with 'File Name:' and a 'Choose File' button with the message 'No file chosen'. Below this is a 'Comments:' input field and a 'upload' button. The main body of the dialog contains a table with columns: 'sl', 'Name', 'Remarks', 'Modified', and 'Actions'. There is one row in the table with the following data: sl=1, Name='PDF1290166288526.pdf', Remarks='remarks', Modified='2010-12-13 13:29:58', and Actions containing a 'delete' link. The entire dialog box has a red border.

Fig 4-31-b: Managing references

Click on the "Choose File" button and select a file. Add a comment and click on upload button. Please note that maximum permitted size of the file is limited by "**max\_allowed\_packet**" configuration of the database server (default is **1048576 bytes**) in case of MySQL server. Newly added file will be displayed in the table.

Click on "delete" link on the left of a listed reference to delete it from database. Click on the file-name to open/save the file locally.

## 5 Utilities

**APPLICATION** is shipped with a set of useful modules like Unit Converter, Document Management system.

**Fig 5-1:** Utilities menu

### Getting Started

Expand the Utilities menu in the main menu-bar to access following modules:

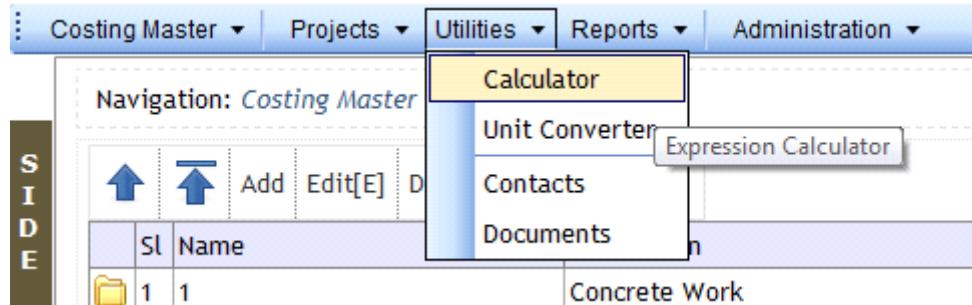

**Calculator:** General purpose Expression calculator.

**Unit Converter:** Convert between commonly used units.

**Contacts:** Manage important contacts.

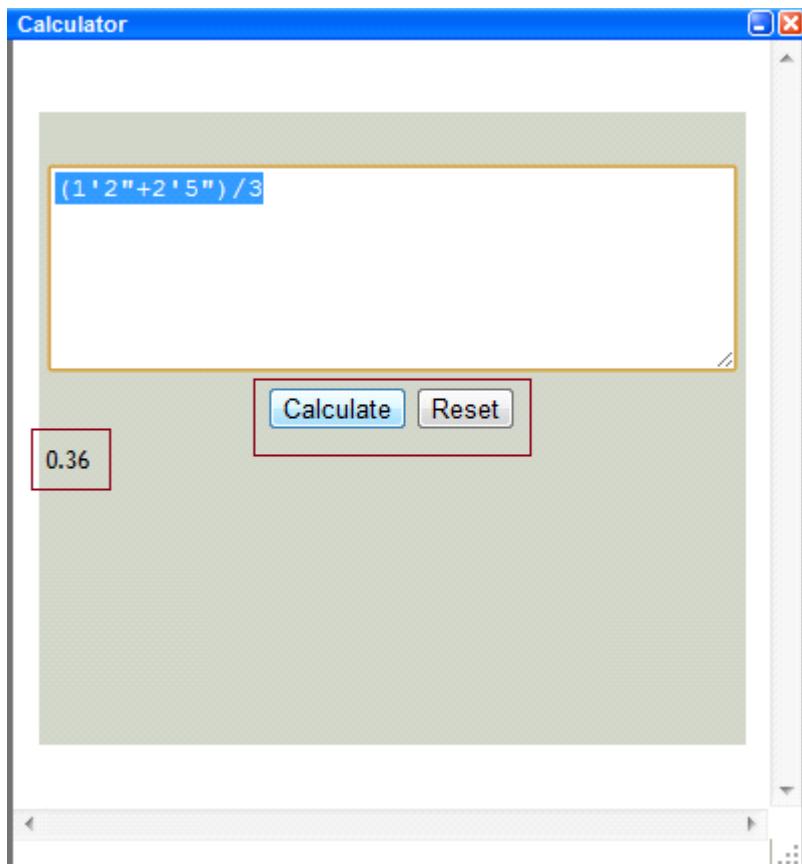

**Documents:** Lightweight document management system, documents are stored in database.

### 5.1 Calculator

**Fig 5-2-a:** Opening calculator

Calculator module can be accessed by selecting Utilities-> **Calculator** from the main menu-bar.

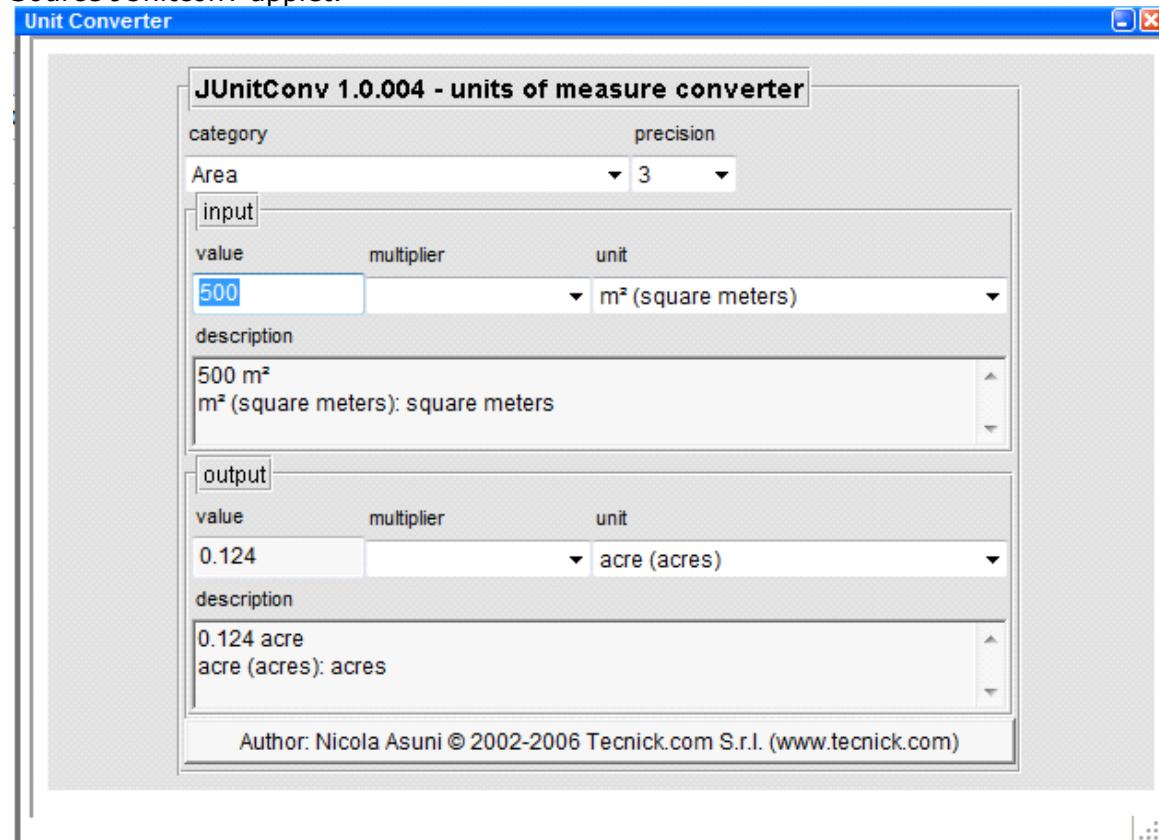

**Fig 5-2-b:** using the calculator

Enter an arithmetic expression and click on Calculate button to evaluate the expression. Following arithmetic operations are supported: Braces [()], Addition [+], Subtraction [-], Multiplication [\*], Division [/]. Values expressed in Feet ['] and Inches ["] are supported but these values are internally converted into meters before the final calculation.

Click on the reset button to clear the text-field.

## 5.2 Unit Converter

Select Utilities->**Unit Converter** from the main menu-bar to open the unit-converter sub-window inside the workspace. Unit converter is based on Open-Source JUnitconv applet.

**Fig 5-3:** Unit converter applet

## 5.3 Contacts

Contacts module may be used for managing contact records (e.g. employees, vendors, clients). Select Utilities->**Contacts** to access the contacts database.

Navigation: Utilities >> Contacts						
SIDE MENU	Add Directory	Add Contact	Edit[E]	Delete[D]	Search	
						<a href="#">Reload</a> <a href="#">Help</a>
	1 subDir	Sample subdirectory				
	2 IFCII	food corporation of india		sector - 24 Noida	012022356521	
	3 Wanhive	Wanhive Technologies (P) Ltd.		Wanhive Technologies' address	+91-11-123456789	

**Fig 5-4:** Contacts module

**Moving Around:** Contacts may be arranged in directories. Click on "directory icon" to view the contents of a directory. Click on "up icon" to move back to the parent directory. Click on "top icon" to move to the first level.

### 5.3.1 Adding a new Directory or Contact

**Adding a new directory:** Click on "Add Directory" in the workspace menu, or right click inside the content-table and select Add New->New Directory from the context menu.

**Adding a new contact:** Click on "Add Contact" in the workspace menu. Alternatively, right click inside the content-table and select Add New->New

Contact from the context menu.

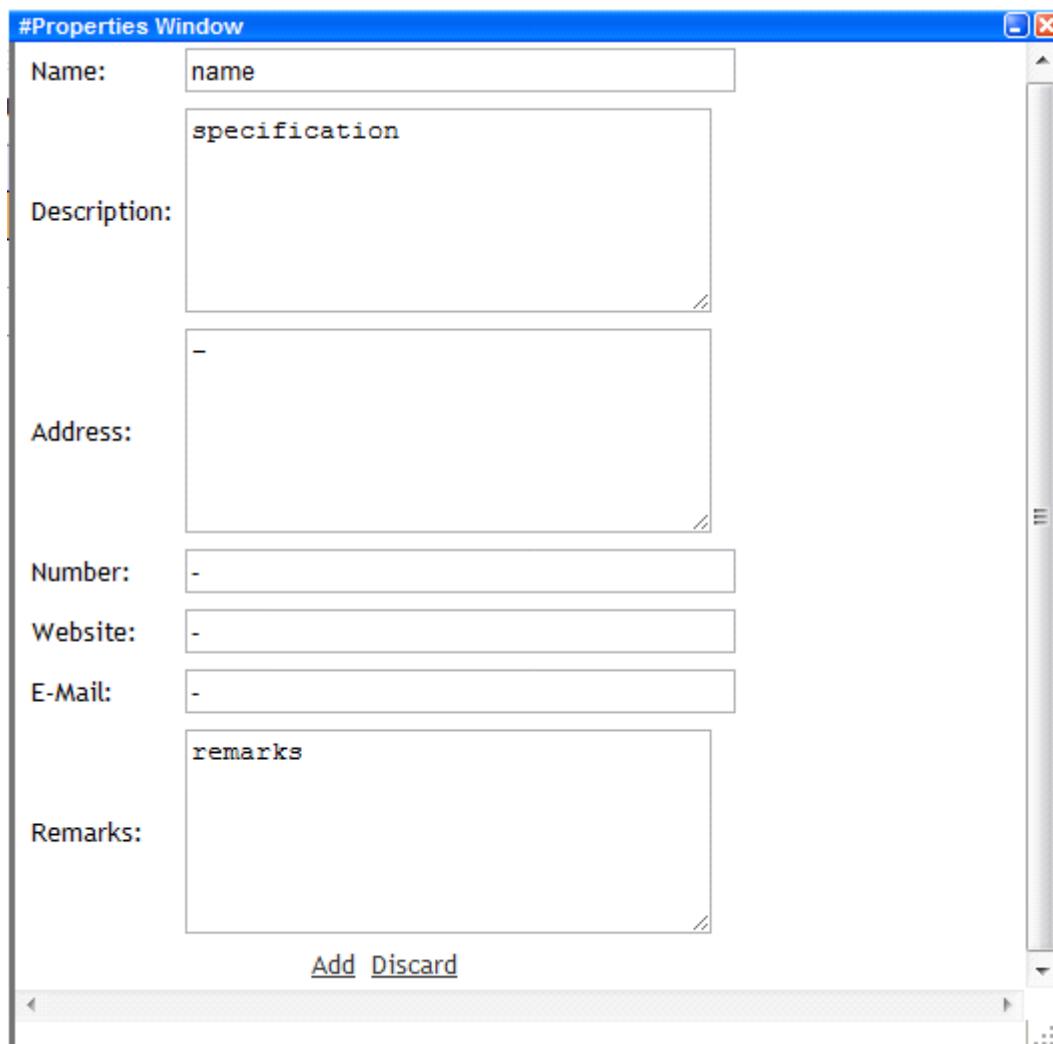

The screenshot shows a software interface with a navigation bar at the top. Below the navigation bar is a table with columns for Sl. No., Name, Description, Address, Number, and checkboxes for D and E. A context menu is open over the first row of the table, showing options: Up, Top, Add New (with sub-options New Directory and New Contact), Modify, and Show Details. The 'Add New' option is highlighted.

Sl. No	Name	Description	Address	Number	D	E
1	subDir	Sample subdirectory	--	--	<input type="checkbox"/>	<input checked="" type="radio"/>
2	IFC1	food corporation of india	sector - 24 Noida	012022356521	<input type="checkbox"/>	<input checked="" type="radio"/>
3	Wanhive	Wanhive Technologies (P) Ltd.	Wanhive Technologies' address	+91-11-123456789	<input type="checkbox"/>	<input checked="" type="radio"/>

Fig 5-5-a: Adding new directory or contact

The screenshot shows the 'Properties Window' dialog box. It has four input fields: 'Name' (containing 'name'), 'specification' (containing 'specification'), 'Specification' (empty), 'remarks' (containing 'remarks'), and 'Remarks' (empty). At the bottom are 'Add' and 'Discard' buttons.

Fig 5-5-b: Screenshot of properties window for adding a new directory

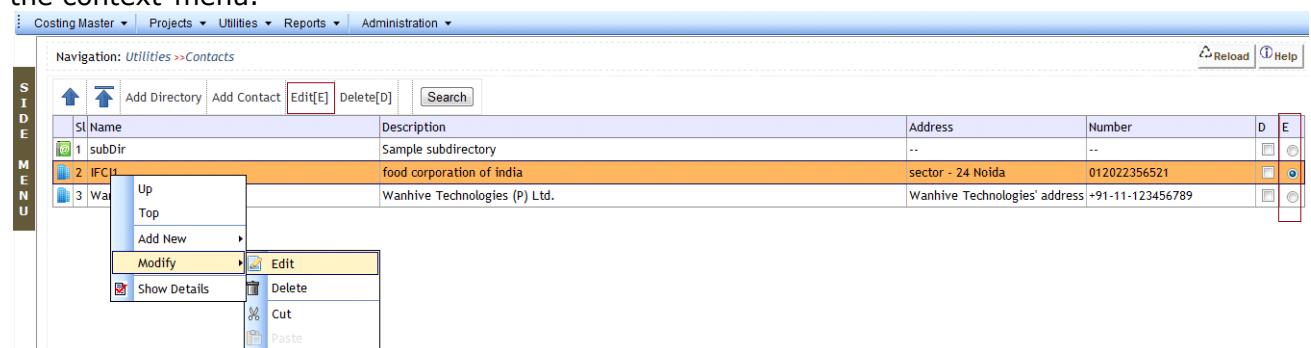

**Fig 5-5-c:** Screenshot of the properties window for new contact

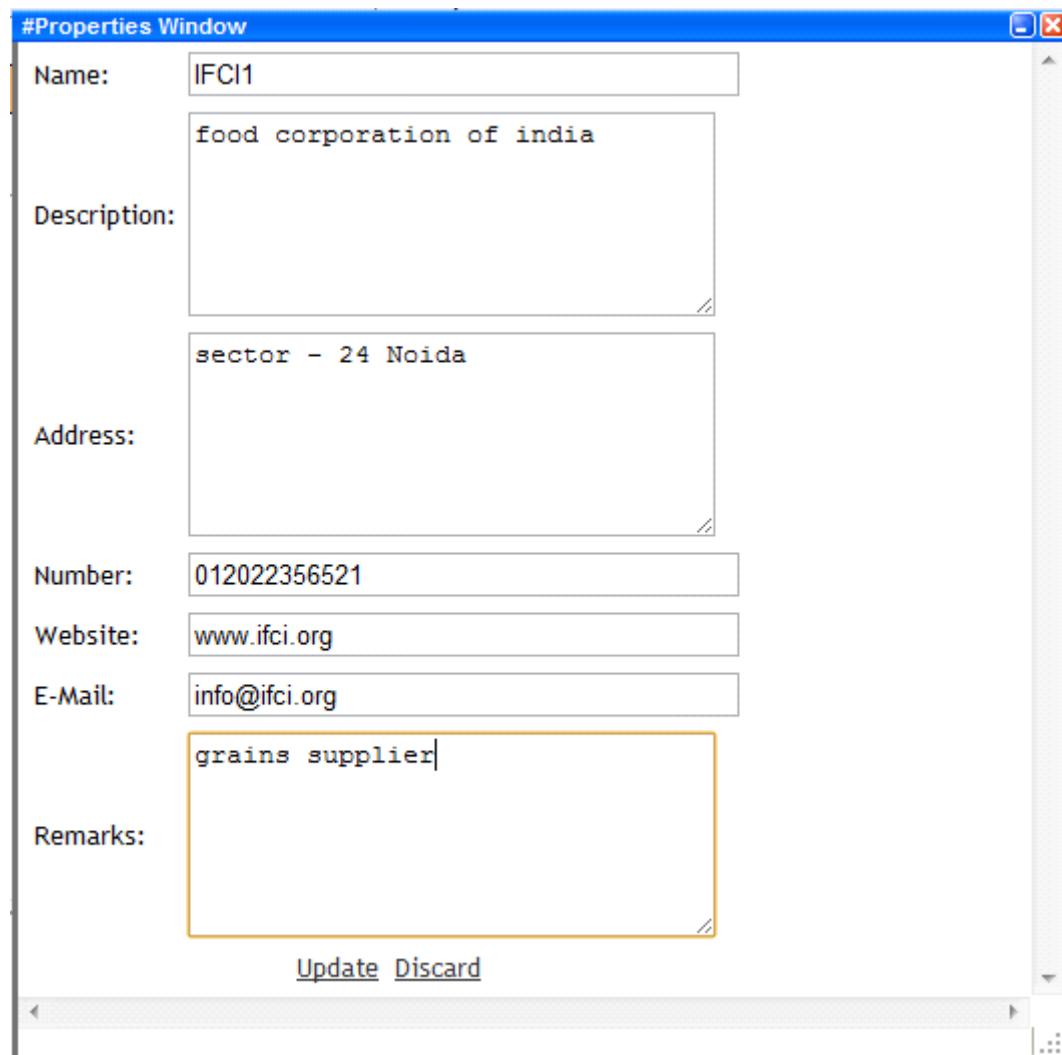

Fill-in the details and click on "Add" inside the properties window to add the new item into database. Click on "Discard" to close the properties window without modifying the database. Please note that all fields are mandatory and may not be left blank.

### 5.3.2 Modifying existing Directories or Contacts

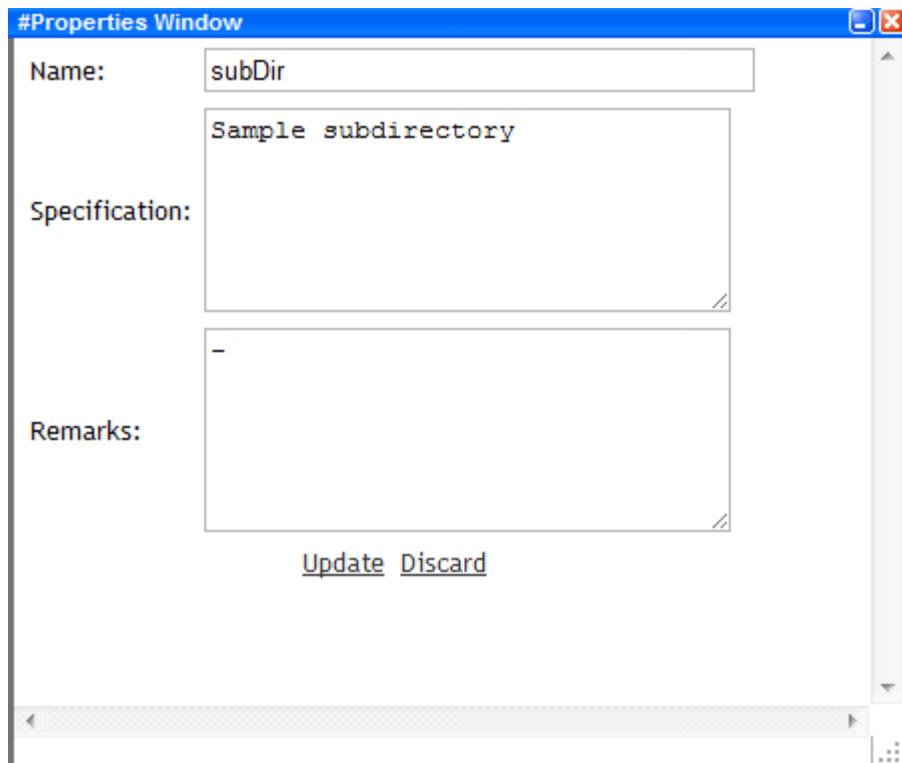

Select an item from the list through radio-button and click on "Edit" in the workspace menu. Alternatively, right click over an item and select Modify->Edit in the context-menu.

**Fig 5-6-a:** Editing an existing contact or directory

**Fig 5-6-b:** Screenshot of the properties window showing details of a contact

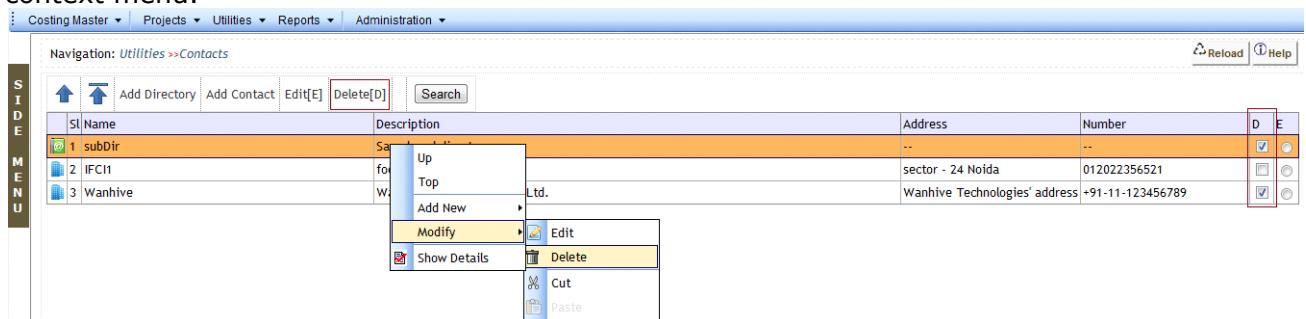

**Fig 5-6-c:** Screenshot of properties window showing the current details of a directory

Click on "Update" to update details of the selected item, or click on "Discard" to close the window discarding all changes.

### 5.3.3 Deleting Directories or Contacts

Select one or more items through checkboxes and click on "Delete" inside the workspace menu, or right click over an item and select Modify->Delete from the context menu.

**Fig 5-7:** Deleting a contact/directory

### 5.3.4 Moving/Copying an existing Directory or Contact

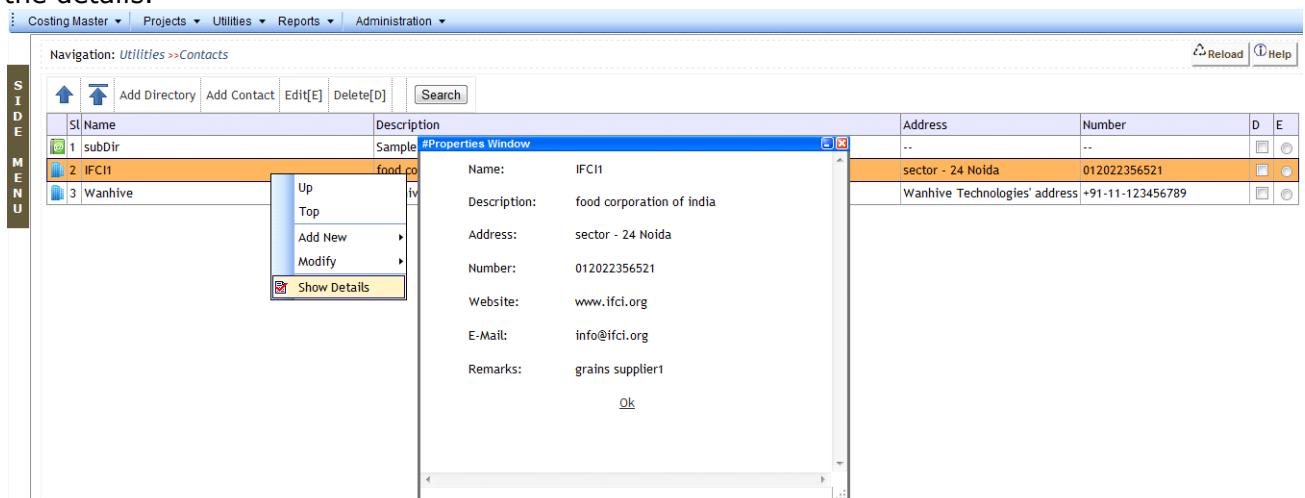

Right click over an item and select Modify->Cut from the context menu. Navigate to destination directory, right click and select Modify->Paste from the context menu. Please note that "Copy" option is not available, and "paste" option is available if an item to be moved has already been selected.

**Fig 5-8:** Moving a contact/directory

### 5.3.5 Viewing details of an existing Directory or Contact

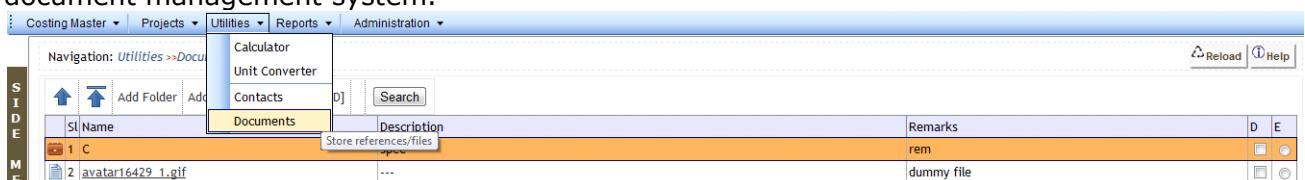

Right click over an item and select "Show Details" from the context menu to view the details.

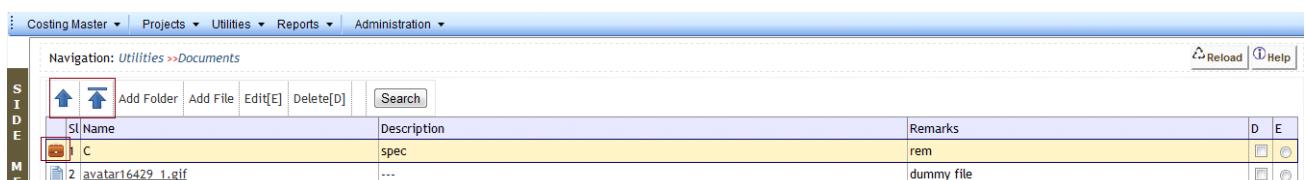

**Fig 5-9:** Details of a contact

## 5.4 Documents

Select Utilities->**Documents** from the main menu-bar to load the lightweight document management system.

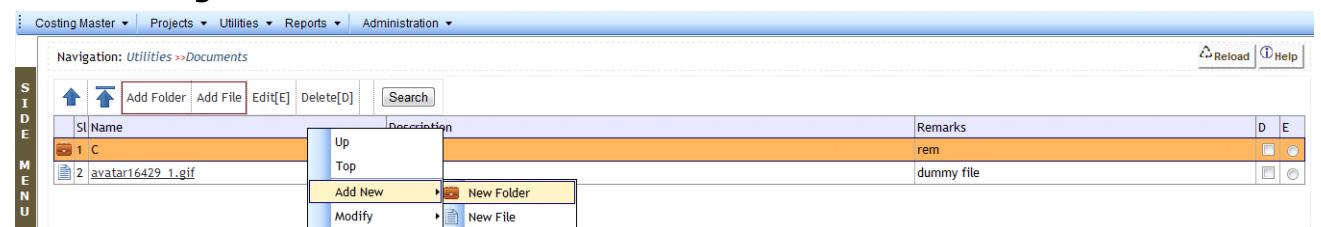

**Fig 5-10-a:** Loading Documents module

**Fig 5-10-b:** Viewing files and folders

**Moving Around:** Click on the "folder icon" to view items (files/folders) inside a folder. Click on "up icon" to move back to the parent folder. Click on the "top icon" to move to the first level.

#### 5.4.1 Adding a new Folder or File

**Fig 5-11-a:** Adding files/folders

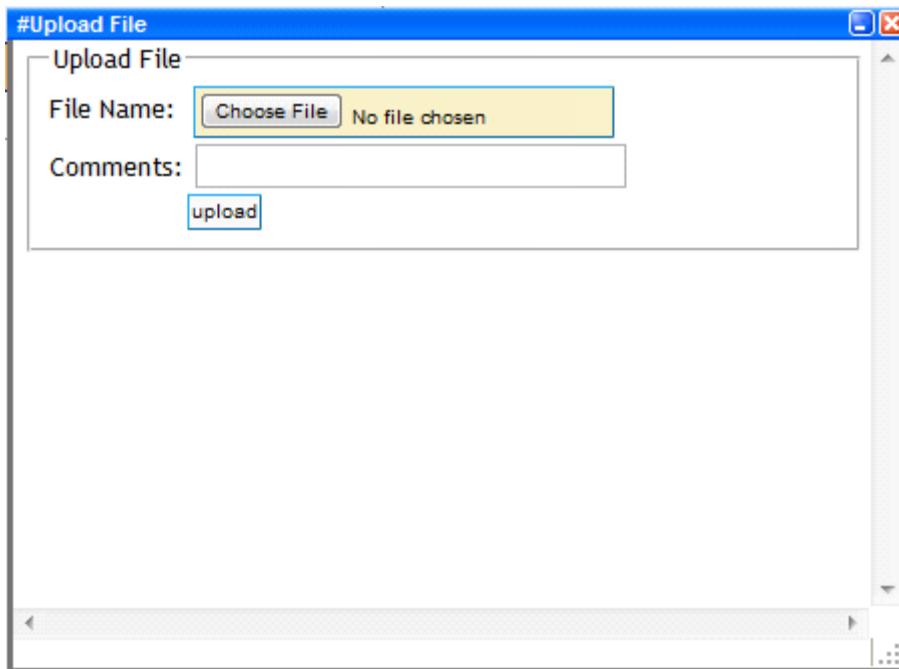

**Adding a new Folder:** Click on "Add Folder" in the workspace menu or right click inside the content-table and select Add New->New Folder from the context menu.

**Fig 5-11-b:** Screenshot of the properties window for new folder

Fill-in the details and click on "Add" to add a new folder into database. Click on "Discard" to close the window discarding the changes.

**Adding a new File:** Click on "Add File" in the workspace menu or right click inside the content-table and select Add New->New File from the context menu.

**Fig 5-11-c:** Screenshot showing the File upload window for adding a new file into the database

Choose a file from local disk, add a comment and click on "upload" button to upload the file into database. Please note that maximum size of the file is limited by **"max\_allowed\_packet"** configuration of the database server (default is **1048576 bytes**) in case MySQL database server is being used.

#### 5.4.2 Modifying an existing Folder or File

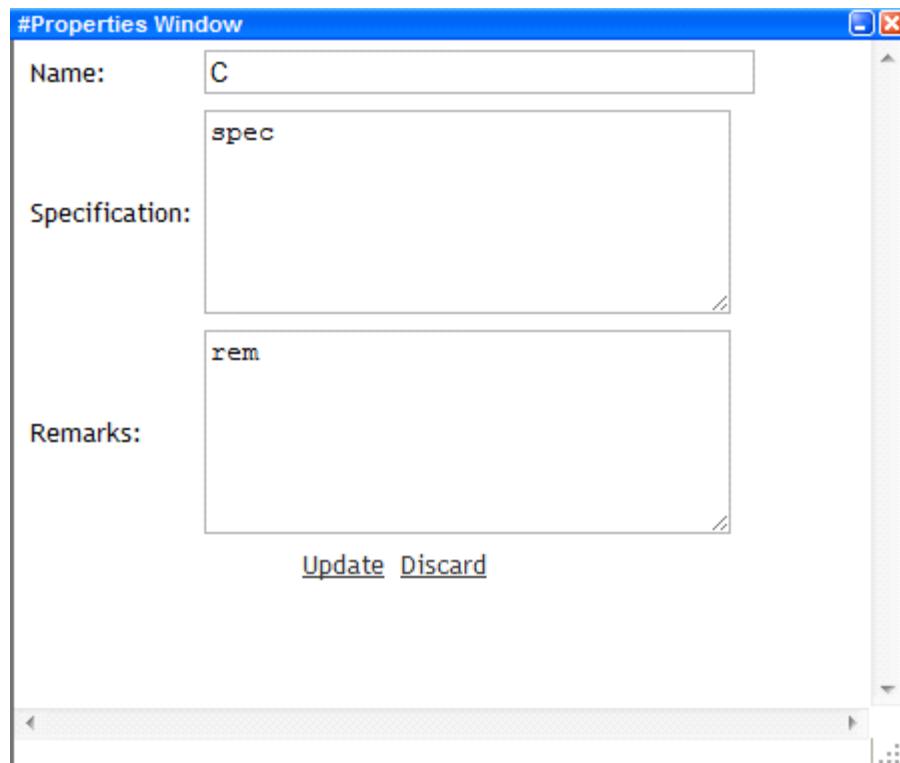

To modify details of an existing folder or file select the item through radio-button and click on "Edit" in the workspace menu. Alternatively, right click over an item and select Modify->Edit from the context menu.

The screenshot shows the 'Costing Master' application interface. On the left is a vertical sidebar labeled 'SIDE MENU'. The main area displays a table with two rows of data:

Sl. No.	Name	Description	Remarks
1	C	pec	rem
2	avatar16429_1.gif		dummy file

At the top, there are buttons for 'Add Folder', 'Add File', 'Edit[E]', 'Delete[D]', and 'Search'. The 'Edit[E]' button is highlighted with a red box. A context menu is open over the second row ('avatar16429\_1.gif'), showing options: 'Up', 'Top', 'Add New', 'Modify', 'Edit', 'Delete', 'Cut', and 'Paste'. The 'Edit' option is also highlighted with a yellow box.

**Fig 5-12-a:** Editing a file/folder

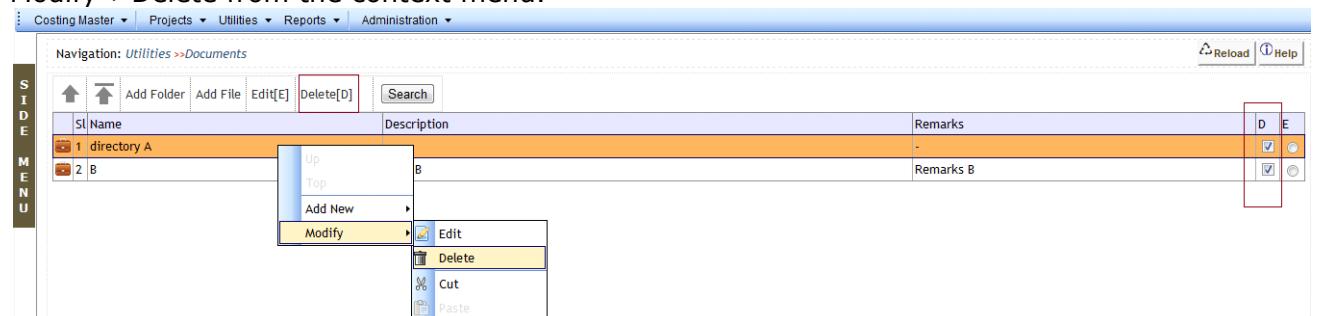

**Fig 5-12-b:** Screenshot of the properties window displaying the details of a folder

Make changes and click on "Update" to update the database. Click on "Discard" to close the window discarding the changes.

#### 5.4.3 Deleting existing Files or Folders

Select one or more items through checkboxes, and click on "Delete" in the workspace menu. An item can be deleted by right clicking over it and selecting Modify->Delete from the context menu.

**Fig 5-13:** Deleting a file/folder

#### 5.4.4 Moving/Copying an existing Folder or File

Right click over an item and select Modify->Cut from the context menu. Navigate to destination folder, right click inside the content-table and select Modify->Paste from the context menu. Please note that the current application doesn't support copying of files or folders.

**Fig 5-14:** Moving a file/folder

## 6 Reports

This tutorial familiarizes users with the Reports module.

### Getting started

Current package provides facility for generating reports in PDF only.

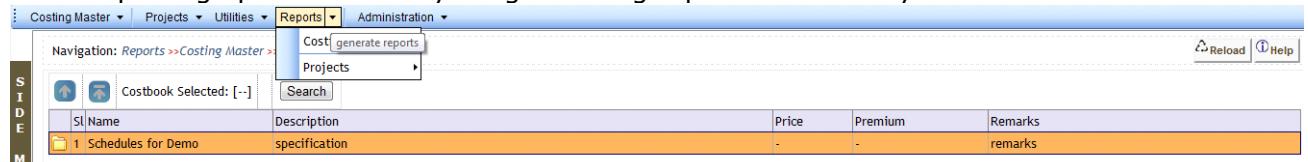

Fig 6-1: Reports menu

Expand the "Reports" menu in the main menu-bar. Menu items direct users to following modules:

#### **Costing Master**

Assemblies: Print list of assemblies and "Analysis of Rates".

Resources: Print the list of resources.

#### **Projects**

Definitive Estimate: Print Material Takeoff, Bill of Quantity for projects and estimates.

Control Estimate: Print status reports and projections for projects and estimates.

### 6.1 Assemblies

Select Reports->Costing Master->**Assemblies** to view the list of assemblies in database.

The screenshot shows the 'Assemblies' section of the Reports module. The navigation path is 'Reports > Costing Master > Assemblies'. The workspace shows a list of assemblies categorized under 'Costbook Selected: [-]'. The table has columns 'Sl. Name', 'Description', 'Price', 'Premium', and 'Remarks'. A tooltip 'Generate Assembly list and associated reports' is visible over the 'Search' button.

Sl. Name	Description	Price	Premium	Remarks
1 1	Concrete Work	-	-	remarks
2 2	Reinforced Bars	-	-	remarks
3 3	Whitewash	-	-	remarks
4 4	Steel Work	-	-	remarks
5 5	Shuttering	-	-	remarks
6 6	Paint	-	-	remarks
7 7	Supplies	-	-	remarks
8 8	Non-Supplies	-	-	remarks
9 Piling	specification	-	-	remarks
10 NS	specification	-	-	remarks
11 11	derived items	-	-	remarks

Fig 6-2: Loading assemblies report module

**Moving Around**: Assemblies may be arranged in categories. Click on "category icon" to view all assemblies listed under the selected category. Click on "up icon" in the workspace menu to move back to parent category. Click on "top icon" to move to the first level.

#### 6.1.1 Printing list of Assemblies

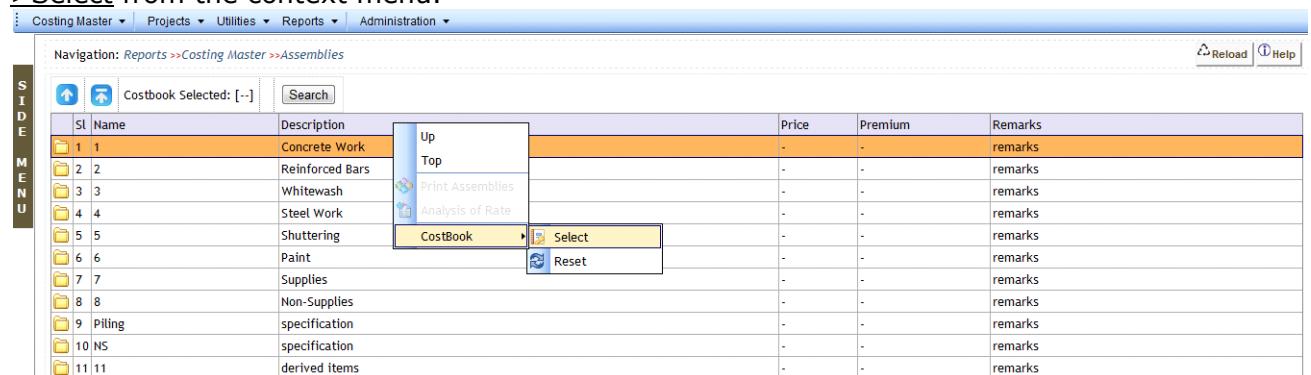

Right click over an item and select Print Assemblies from the context menu. If the selected item is a category, all nested items will be recursively printed.

Assembly Report: [1] Concrete Work  
 {CostBook: "--"}

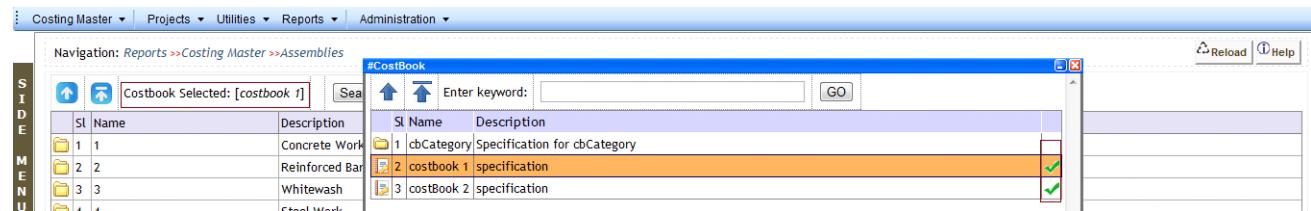

Sl	Name	Specification	Unit	Price	Premium (%)	Remarks
#	1	Concrete Work	--	-	-	- remarks
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg of cement per cum of concrete.	cum	4,147.40	0.00	5.33
2	1.2	Providing M-30 grade reinforced cement concrete by using 410 kg of cement per cum of concrete.	cum	54.55	0.00	5.34
3	1.3	SCREED CONCRETE	cum	0.00	0.00	NS
4	1.4	1:4.8 (1 Cement : 4 coarse sand : 8 graded stone aggregate 40 mm nominal size)	cum	2,449.00	0.00	4.1.8
5	1.5	1:3.6(1 Cement : 3 coarse sand : 6 graded stone aggregate 20 mm nominal size)	cum	2,791.05	0.00	4.1.5
6	1.6	Grouting	cum	0.00	0.00	N.S.

**Fig 6-3:** Printing Assemblies

**Printing cost-book defined unit-rates:** Cost-books are used for preparing "analysis of rates" of assemblies. Please note that it's not mandatory to define "analysis of rates" of all assemblies in a cost-book. To print the cost-book defined unit-rates and premiums, right click inside the content-table and select CostBook->Select from the context menu.

**Fig 6-4-a:** Selecting cost-book

**Fig 6-4-b:** Cost-book selection window

Click on "Tick icon" to select a cost-book from the list. Selected cost-book's name will be displayed inside the workspace menu.

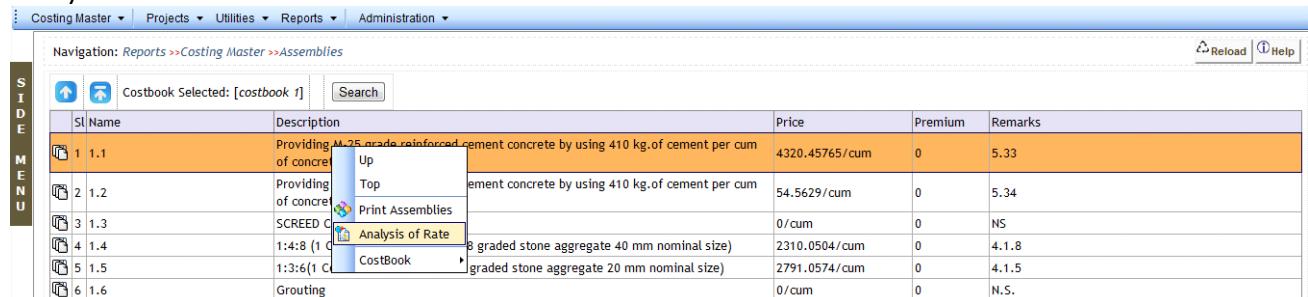

Assembly Report: [1] Concrete Work  
 {CostBook: "costbook 1"}

Sl	Name	Specification	Unit	Price	Premium (%)	Remarks
#	1	Concrete Work	--	-	-	- remarks
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg of cement per cum of concrete.	cum	4,320.46	0.00	5.33
2	1.2	Providing M-30 grade reinforced cement concrete by using 410 kg of cement per cum of concrete.	cum	54.56	0.00	5.34
3	1.3	SCREED CONCRETE	cum	0.00	0.00	NS
4	1.4	1:4.8 (1 Cement : 4 coarse sand : 8 graded stone aggregate 40 mm nominal size)	cum	2,310.05	0.00	4.1.8
5	1.5	1:3.6(1 Cement : 3 coarse sand : 6 graded stone aggregate 20 mm nominal size)	cum	2,791.06	0.00	4.1.5
6	1.6	Grouting	cum	0.00	0.00	N.S.

**Fig 6-5:** Screenshot of report showing the list of assemblies with cost-book defined unit-rates (if unit-rates of assemblies are not defined, standard unit-rate will be displayed in the report)

### 6.1.2 Printing Analysis of Rate

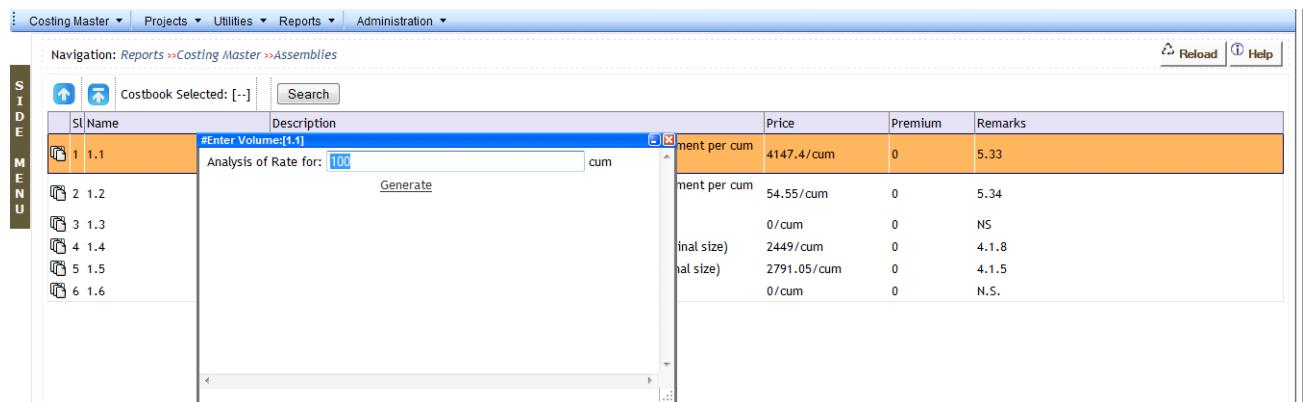

Select a cost-book (this is an important step, as "Analysis of Rates" are prepared in the cost-books) as described above. Right click over an assembly and select Analysis of Rate from the context menu.

The screenshot shows a software interface with a menu bar at the top. In the center, there is a table listing various assemblies with columns for Sl. No., Name, Description, Price, Premium, and Remarks. Assembly 1.1 is selected and highlighted in orange. A context menu is open over assembly 1.1, showing options like 'Up', 'Top', 'Print Assemblies', and 'Analysis of Rate'. The 'Analysis of Rate' option is highlighted with a blue selection box.

Sl. No.	Name	Description	Price	Premium	Remarks
1 1.1	Providing M-25 grade reinforced cement concrete by using 410 kg. of cement per cum	4320.45765/cum	0	5.33	
2 1.2	Providing of concrete	54.5629/cum	0	5.34	
3 1.3	SCREED C	0/cum	0	NS	
4 1.4	1:4:8 (1	2310.0504/cum	0	4.1.8	
5 1.5	1:3:6(1 CostBook	2791.0574/cum	0	4.1.5	
6 1.6	Grouting	0/cum	0	N.S.	

**Fig 6-6-a:** Printing Analysis of Rate

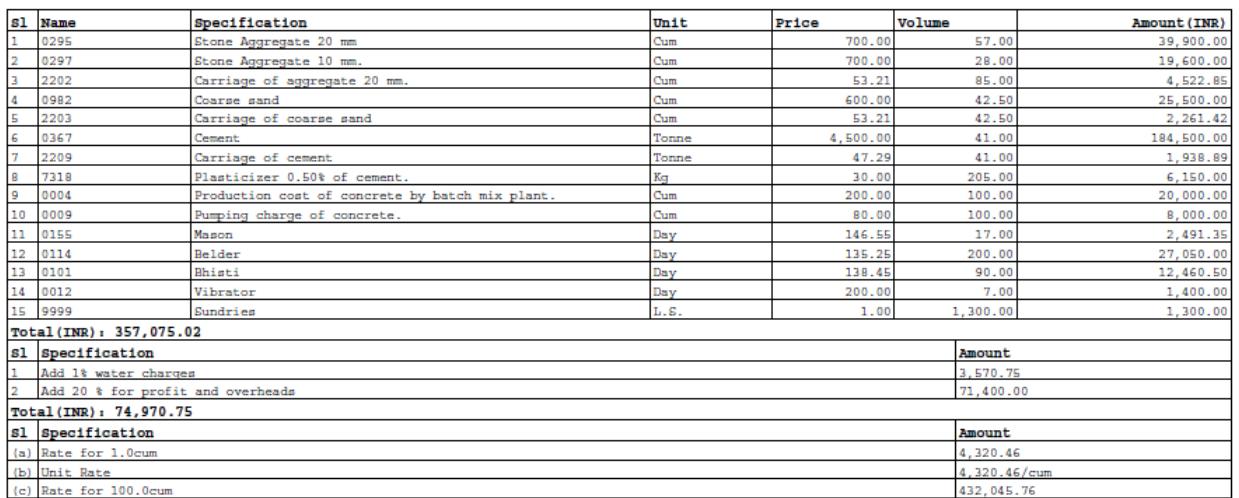

The screenshot shows the same software interface as Fig 6-6-a. A dialog box has appeared over the main table. It contains a text input field labeled '#Enter Volume:[1.1]' with '100' typed into it, and a button labeled 'Generate'.

Sl. No.	Description	Price	Premium	Remarks
1 1.1	#Enter Volume:[1.1] Analysis of Rate for: 100 cum	4147.4/cum	0	5.33
2 1.2		54.55/cum	0	5.34
3 1.3		0/cum	0	NS
4 1.4		2449/cum	0	4.1.8
5 1.5		2791.05/cum	0	4.1.5
6 1.6		0/cum	0	N.S.

**Fig 6-6-b:** Filling-in amount of assembly for which analysis of rate will be generated

Fill an amount inside the text-box and click on "Generate".

Analysis of Rate for 100.0 cum of: [1.1] Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete.  
(CostBook: "costbook 1")

The screenshot shows a detailed report for assembly 1.1. The report header indicates 'Analysis of Rate for 100.0 cum of: [1.1] Providing M-25 grade reinforced cement concrete by using 410 kg.of cement per cum of concrete. (CostBook: "costbook 1")'. The report body is a table with columns for Sl. No., Name, Specification, Unit, Price, Volume, and Amount (INR). The table lists various components and their costs, such as Stone Aggregate 20 mm, Coarse sand, Cement, etc. At the bottom, there are summary rows for total amounts and breakdowns for water charges and overheads.

sl	Name	Specification	Unit	Price	Volume	Amount (INR)
1	0295	Stone Aggregate 20 mm	Cum	700.00	57.00	39,900.00
2	0297	Stone Aggregate 10 mm.	Cum	700.00	28.00	19,600.00
3	2202	Carriage of aggregate 20 mm.	Cum	53.21	85.00	4,522.85
4	0982	Coarse sand	Cum	600.00	42.50	25,500.00
5	2203	Carriage of coarse sand	Cum	53.21	42.50	2,261.42
6	0367	Cement	Tonne	4,500.00	41.00	184,500.00
7	2209	Carriage of cement	Tonne	47.29	41.00	1,938.89
8	7318	Plasticizer 0.50% of cement.	Kg	30.00	205.00	6,150.00
9	0004	Production cost of concrete by batch mix plant.	Cum	200.00	100.00	20,000.00
10	0009	Pumping charge of concrete.	Cum	80.00	100.00	8,000.00
11	0155	Mason	Day	146.55	17.00	2,491.35
12	0114	Belder	Day	135.25	200.00	27,050.00
13	0101	Rhasti	Day	138.45	90.00	12,460.50
14	0012	Vibrator	Day	200.00	7.00	1,400.00
15	9999	Sundries	L.S.	1.00	1,300.00	1,300.00
<b>Total (INR): 357,075.02</b>						
<b>sl Specification</b>						
1	Add 1% water charges					3,570.75
2	Add 20 % for profit and overheads					71,400.00
<b>Total (INR): 74,970.75</b>						
<b>sl Specification</b>						
(a)	Rate for 1.0cum					4,320.46
(b)	Unit Rate					4,320.46/cum
(c)	Rate for 100.0cum					432,045.76

**Fig 6-6-c:** Screenshot of the report containing detailed "Analysis of Rate" of an assembly

## 6.2 Resources

Select Reports->Costing Master->**Resources** from main menu-bar to view the list of resources and categories.

Costing Master		Projects	Utilities	Reports	Administration
		Costing Master > Assemblies Projects > Resources			
SIDE	MENU	Costbook Selected: [-]  Search			
		Generate Material List and associated report			
Sl	Name	Description	Price	Remarks	
1	Basic rates	Materials, Labour, Equipments	-	remarks	

**Fig 6-7:** Loading Resources (reports) module

**Moving Around:** Resources may be arranged in categories. Click on "category icon " to view all resources and sub-categories listed under a category. Click on "up icon " inside the workspace menu to move back to the parent category. Click on "top icon " to move to the top level.

### 6.2.1 Printing list of resources

To recursively print the list of resources under a category right click over the category and then select "Print" from the context menu.

Navigation: Reports >Costing Master >>Resources					
SIDE	MENU	Costbook Selected: [-]	Search	Reload	Help
		Sl Name	Description	Price	Remarks
		1 Basic rates	Materials, Labour, Equipments	-	remarks

**Fig 6-8-a:** Printing resources

### 6.3 Definitive Estimate

Select Reports->Projects->**Definitive Estimate** from the main menu-bar to view the list of projects and estimates.

Sl Name	Description	Remarks	CostBook
1 Demo	Demo Project Directory	remarks	..
2 Demo 2	Demo Project	remarks	..

**Fig 6-11:** Loading definitive estimate (reports) module

**Moving Around:** Click on the "Project Directory icon" to view the list of all sub-projects and estimate under a project directory. Click on "up icon" in the workspace menu to move back to the parent project directory. Click on "top icon" to move back to the first level.

#### 6.3.1 Project Reports

Right click over a listed project directory and select options from the context menu to generate reports in PDF.

Sl Name	Description	Remarks	CostBook
1 Demo	Demo Project Directory	remarks	..
2 Demo	Demo Project	remarks	..

**Fig 6-12:** Context menu showing report options for a project

### **6.3.1.1 References**

Select Reports->References from the context menu to view and download references associated with the selected project.

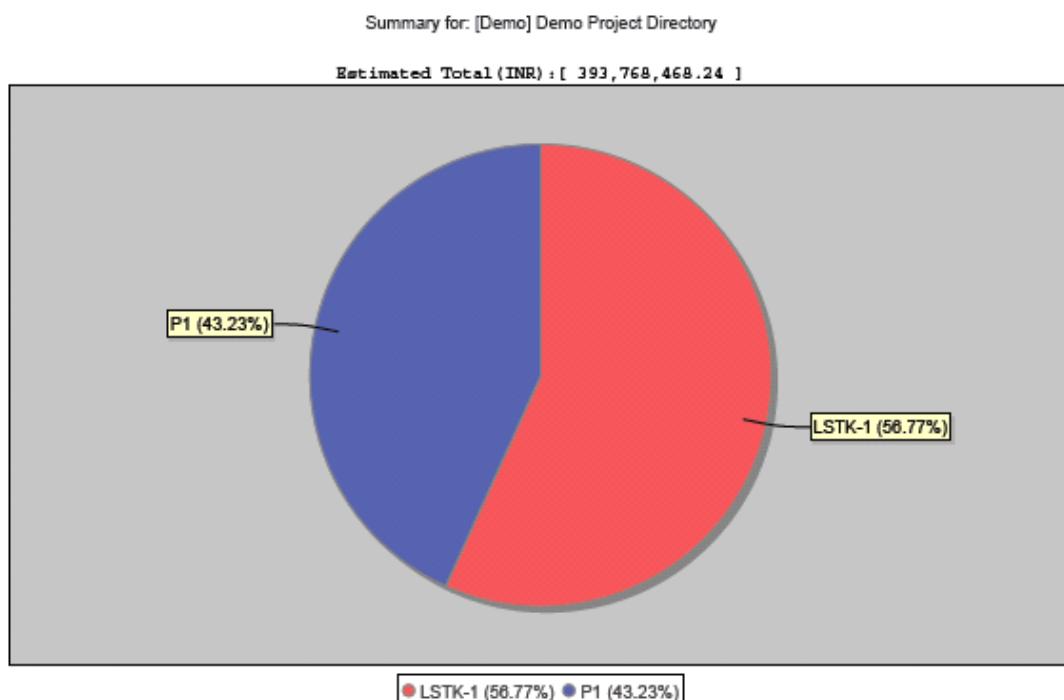

Files for Project: [Demo]				
sl	Name	Remarks	Modified	Size(Bytes)
1	12a.jpg	dummy file	2010-12-12 22:11:59	22704
2	ggfghh.png	dummy image	2010-12-12 22:21:21	636765

**Fig 6-13:** References window

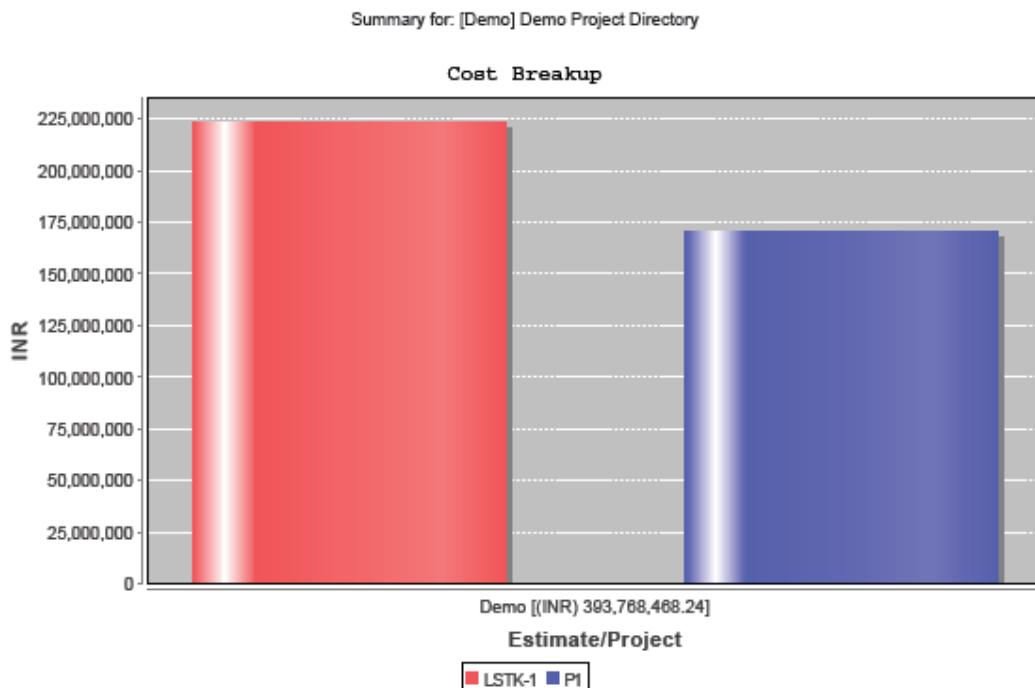

Click on the file name to open/save the file on local machine.

### **6.3.1.2 Project Summary**

Select Reports-> Project Summary to generate the project summary report in PDF. Report contains details of subprojects and estimates under the selected project directory.

**Fig 6-14-a:** Pie chart (Project summary)

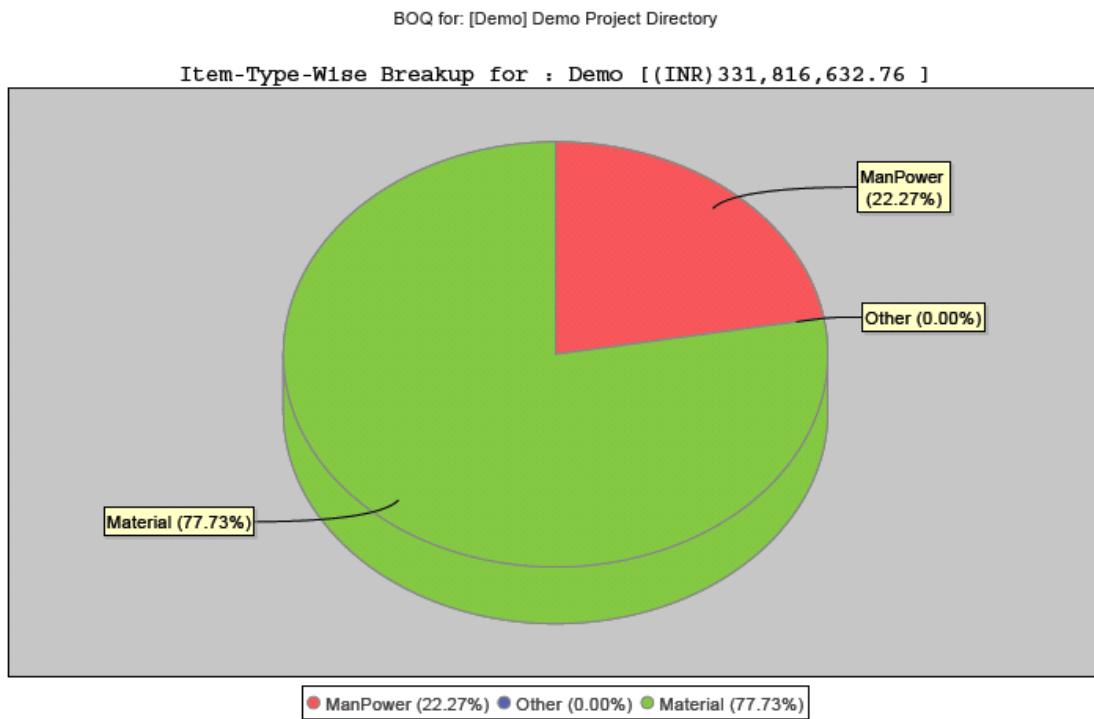

**Fig 6-14-b:** Bar chart (Project summary)

Summary for: [Demo] Demo Project Directory			
<b>SI</b>	<b>Name</b>	<b>Specification</b>	<b>Total (INR)</b>
1.	LSTK-1	INDUSTRIAL COMPLEX	223,529,586.07
1.	P1	specification	<b>170,238,882.17</b>
	LSTK-2	MANGALORE AROMATIC COMPLEX	170,238,882.17
<b>Total (INR): 393,768,468.24</b>			

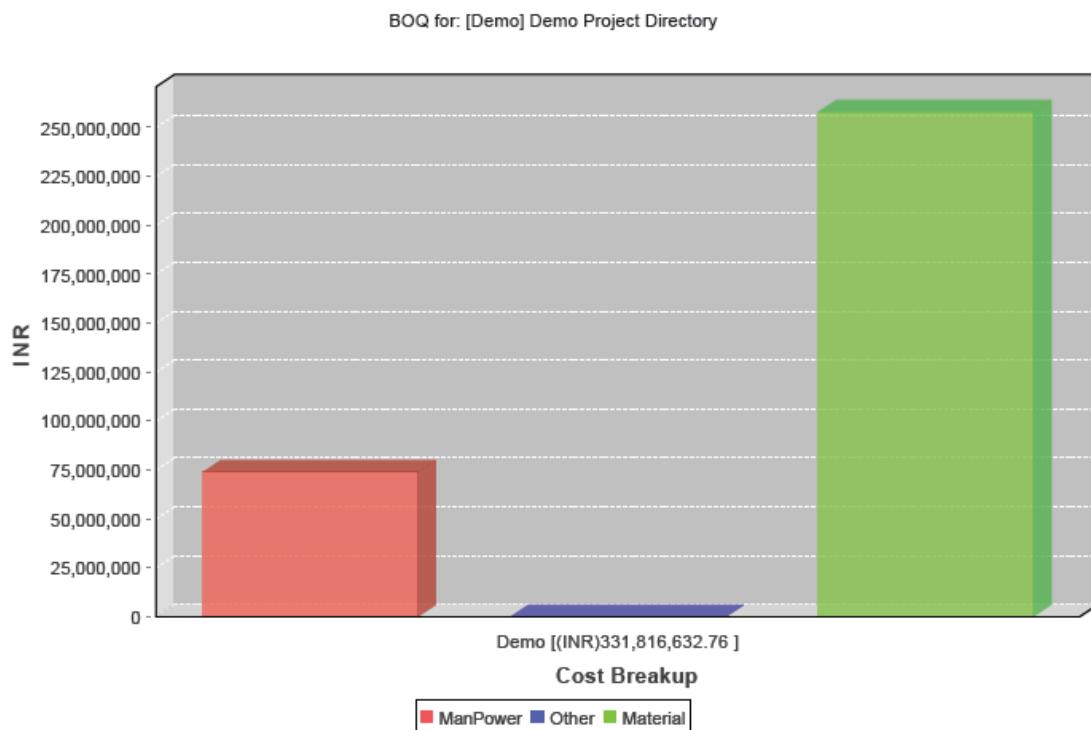

**Fig 6-14-c:** Project summary in tabular format

### **6.3.1.3 Bill of Quantity**

Select Reports->Bill of Quantity from the context menu to generate "Bill of Quantity" for the selected project.

**Fig 6-15-a:** Pie chart (Bill of Quantity)

**Fig 6-15-b:** Bar chart (Bill of Quantity)

Sl	Name	Specification	Total	Average Price	Amount (INR)
36	0100	Bondaxi	105.39	138.45/Day	14,591.00
37	0827	Acid proof paint	359.60	93.00/litre	33,442.80

<b>Total (INR): 331,816,632.76</b>					

**Fig 6-15-c:** Bill of Quantity in tabular format

### 6.3.2 Definitive Estimate Reports

Right click over an estimate and select options from the context menu to generate following reports:

The screenshot shows the software's navigation bar with 'Costing Master' selected. Below it, the main window displays a table for 'INDUSTRIAL COMPLEX' with columns for Sl, Name, Description, Remarks, and CostBook. A context menu is open over row 2, labeled 'LSTK-1'. The menu includes options like 'Up', 'Top', 'Reports', 'References', 'Project Summary', 'Cost Sheet', and 'Bill of Quantity'. The 'Reports' option is highlighted.

Sl	Name	Description	Remarks	CostBook
1	P1	specification	remarks	...
2	LSTK-1	INDUSTRIAL COMPLEX	remarks	costbook 1

**Fig 6-16:** Generating reports for an estimate

### **6.3.2.1 Cost Sheet**

Select Reports-> Cost Sheet from the context menu to generate cost-sheet for the selected estimate.

## Detailed Estimate for: INDUSTRIAL COMPLEX

Sn	SOR No.	Description	Number	Length	Breadth	Height	Weight	Quantity	Rate	Unit	Basic Amount	Premium (%)	Net Amount
1	1.1	Providing M-25 grade reinforced cement concrete by using 410 kg. of cement per cum of concrete.										--	--

34	0775	Debunker white lime	528.45	295.0/Quintal

Fig 6-18: Screenshot of the report containing the BOQ of the selected estimate

### 6.4 Control Estimate

Select Reports-> Projects->**Control Estimate** to view the list of Control Project directories and Estimates.

The screenshot shows the 'Control Estimate' module interface. At the top, there's a navigation bar with tabs for Costing Master, Projects, Utilities, Reports, and Administration. Below the navigation bar is a breadcrumb trail: 'Costing Master > Projects > Control Estimate'. On the left, there's a vertical sidebar labeled 'SIDE MENU' with icons for Up, Top, and Project. The main area displays a table with two rows:

SL Name	Description	Generate Status reports and Projections
1 DemoProject	specification for Demo Project	
2 DemoEstimate	Specification of Demo Estimate	

Fig 6-19: Loading Control estimate (reports) module

**Moving Around:** Click over "Directory icon" on the left of a project directory to view all items (sub-projects/estimates) contained inside it. Click on "up icon" in the workspace menu to move back to the parent project directory. Click on "top icon" to move to the first level.

#### 6.4.1 Project Reports

Right click over a listed project directory and select options from the context menu to generate reports for the selected project in PDF:

##### 6.4.1.1 References

Select Reports->References to view references attached to the selected project.

The screenshot shows the 'References' context menu for the 'demo' project. The menu items are: Up, Top, Project, Estimate, References, and Status Report. The 'Project' item is highlighted.

Fig 6-20-a: Context menu options for generating project reports

Files for Project: [demo]				
sl	Name	Remarks	Modified	Size(Bytes)
1	PDF1290166288526.pdf	remarks	2010-12-13 13:29:58	6513

**Fig 6-20-b:** Screenshots of the reference window

Click on the file name to save/open the file on local machine.

#### 6.4.1.2 Project Status

Select Reports->Status Report to view the project status report in a selected period. Status report can be generated for the purpose of audit or projection.

#Date Picker: [demo]

**Fig 6-22-c:** Resource utilization chart

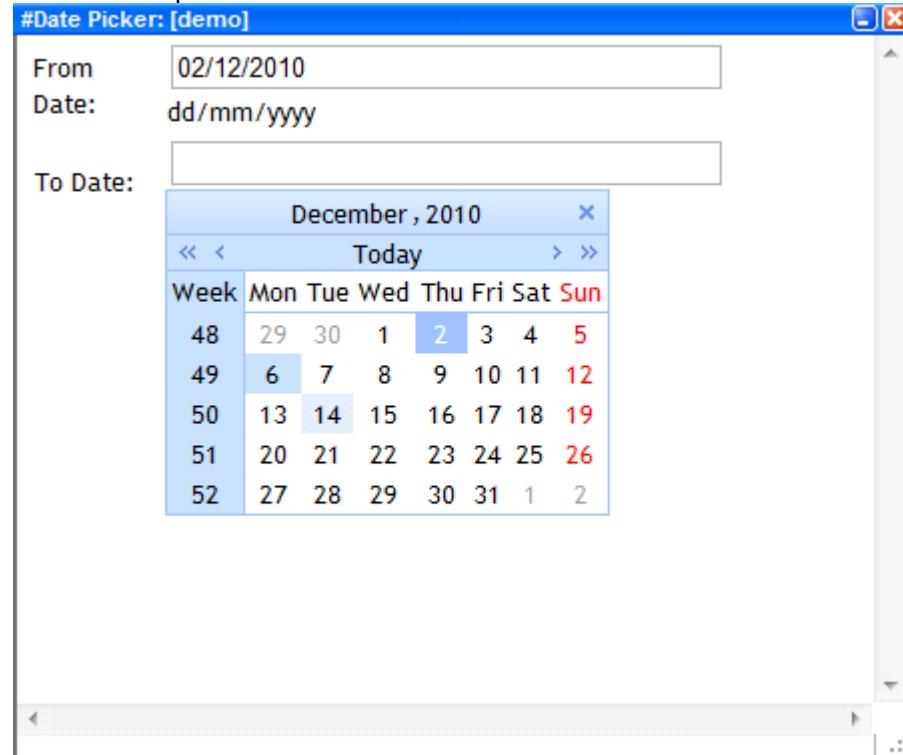

**Fig 6-22-a to 6-22-c** show screenshots of the status report containing Planned, Target and Completed data in terms of Project cost and Resource utilization. Status report may be used for generating projections for a selected timeframe as well.

## 6.4.2 Control Estimate Reports

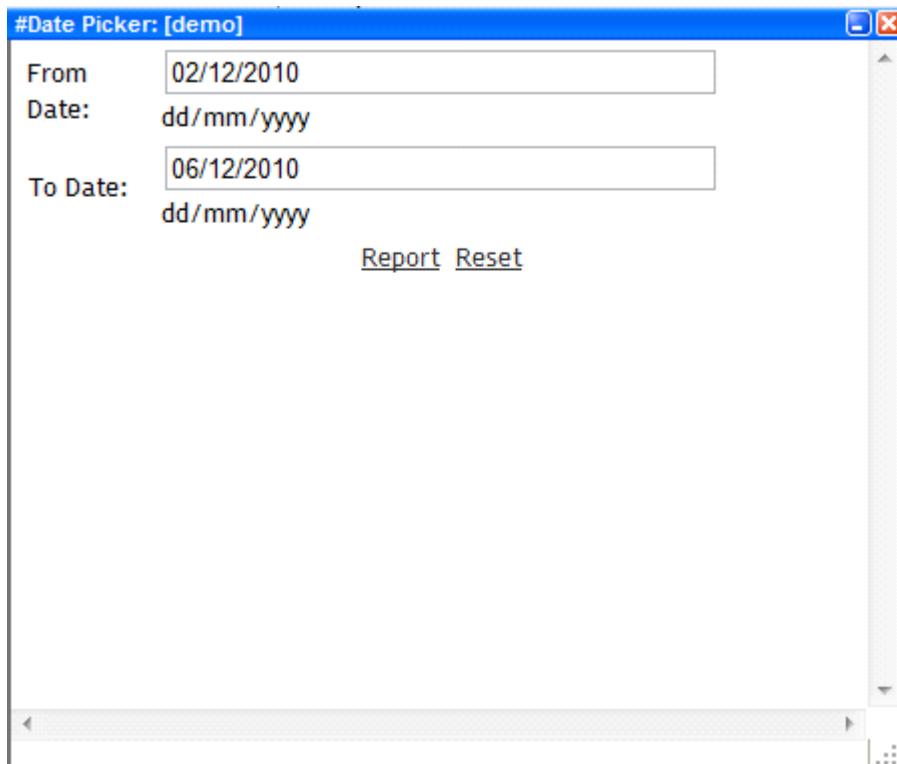

Right click over an estimate and select options from the context menu to generate following reports:

### 6.4.2.1 Status Report

Select Reports->Status Report to generate status report for selected estimate on the basis of planned and as-built data.

**Fig 6-23-a:** Picking start and end dates using the calendar

**Fig 6-23-b:** Status report will be generated for the selected time-frame

Select a timeframe (From date-To date) and then click on "Report" to generate the status report in PDF.

Work Status for: Specification of Demo Estimate From Date: [01/02/2010] To Date: [08/02/2010]

## 7 Administration

This tutorial guides users and system administrators through the system-maintenance processes like personalization, user management etc.

Select menu-options from the Administration menu to access following modules:

**Log-Out:** This is self-explanatory; select this menu-item to log-out from the system. Number of allowed active sessions is limited, therefore users must log-out when not using the APPLICATION. Sessions automatically expires after a period of inactivity of 20 minutes. After expiry, a user must log-out and log-in again.

**Personalize:** Change account's password and select UI theme.

**User Management:** This module may be used for registering new system users and for configuring access-rights of existing users.

### 7.1 Personalize

Select Administration->**Personalize** from the main menu-bar.

Fig 7-1: Loading Personalize module

**Changing Password:** Click on the "Change Password" tab. Fill current and new passwords and the click on "Update" to change the. When a new user account is created, default password is set to "abc". It's advisable that first-time users must immediately change their password after logging into APPLICATION.

**Changing Theme:** Click on the "Select Theme" tab and choose one of the predefined themes from the list. Theme will be applied in the next session.

Fig 7-2-a: Changing theme

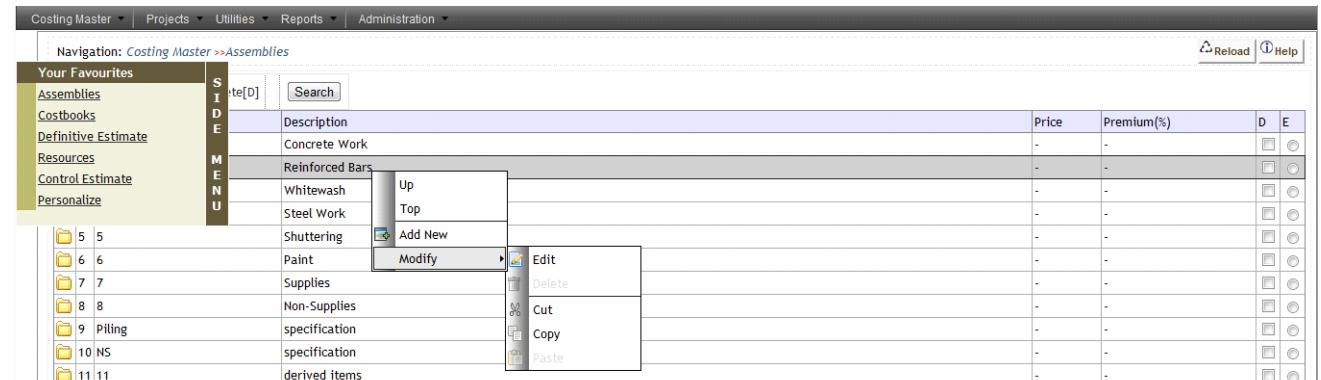

Fig 7-2-b: Screenshot of the User interface with Zune theme

## 7.2 User Management

Select Administration->**User Management** from the main menu-bar to view the list of registered users.

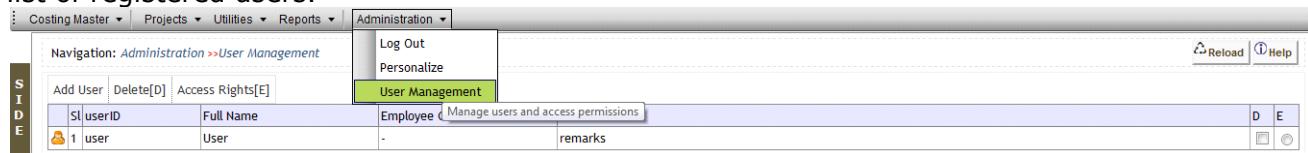

Fig 7-3: Loading User Management module

### 7.2.1 Adding a new User

Click on "Add User" option in the workspace menu, or right click over the content-table and select "Add User" from the context menu.

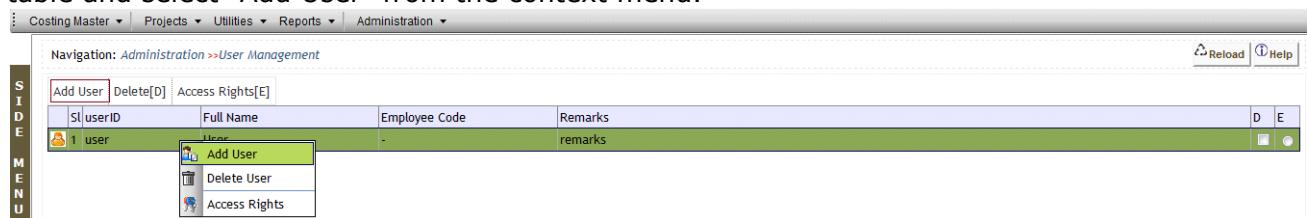

Fig 7-4-a: Adding new user

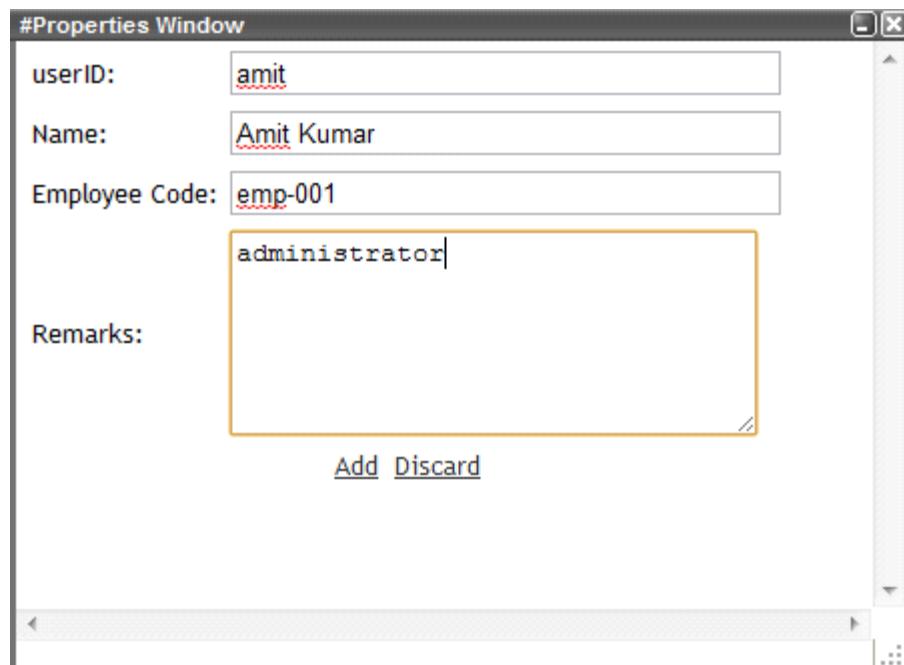

Fig 7-4-b: Properties window for adding a new user

Fill user's details and click on "Add" to add a new user into the database. Default password for the newly added user is "abc".

### 7.2.2 Deleting existing Users

Select one or more users from the list through checkboxes and then click on "Delete" option in the workspace menu. To delete a user right click over it and select "Delete User" from the context menu.

User Management			
Sl.	UserID	Full Name	Employee Code
1	user	User	-
2	amit	Amit	emp-001

D E  
Delete [D] Access Rights [E]

**Fig 7-5:** Deleting users

### 7.2.3 Access Rights

Select a user through the radio-button and then click on "Access Rights" option in the internal menu. Alternatively, right click over a user and select "Access Rights" from the context menu.

User Management			
Sl.	UserID	Full Name	Employee Code
1	user	User	-
2	amit	Amit	emp-001

D E  
Delete [D] Access Rights [E]

**Fig 7-6-a:** Configuring access rights for a user

Permissions for: [ amit ]		
Sl.	Name	Description
1	Assemblies	add/edit/delete work schedules and assemblies
2	Resources	materials/equipments/labor
3	Costbooks	cost of material, assemblies

**Fig 7-6-b:** Screenshot of the permissions window for a selected user

**Moving Around:** Click on the "module icon" on the right of a listed module to view nested modules/actions. Click on "up icon" to move up to the parent module. Click on "top icon" to move back to the first level.

#### 7.2.3.1 Changing Access Rights

A newly added user has access to all modules by default. Access rights are configured recursively, i.e. if access to a particular module is denied to a user, access to all sub-modules/actions will also be denied automatically.

Permissions for: [ amit ]

Sl	Name	Description	
1	Render Assemblies	Render the list of Assemblies	<span style="color: green;">●</span> <span style="color: red;">●</span>
2	Delete Assembly	Delete selected list of Assemblies	<span style="color: green;">●</span> <span style="color: red;">●</span>
3	Update Assembly	Update Assembly	<span style="color: green;">●</span> <span style="color: red;">●</span>
4	Add Assembly	Add new assembly	<span style="color: green;">●</span> <span style="color: red;">●</span>
5	Move Assembly	Move selected Assembly to a different tree	<span style="color: green;">●</span> <span style="color: red;">●</span>
6	Copy Assembly	Duplicate selected Assembly and nested items	<span style="color: green;">●</span> <span style="color: red;">●</span>

**Fig 7-7:** Viewing and changing access rights

If the red indicator is highlighted, access to that module/action is denied to the user. To allow access to a module/action click on the un-highlighted "Green indicator ●". To deny access click on the un-highlighted "Red indicator ●".

## 8 Installation Guide

### 8.1 Deployment Environment

Attributes	Details	Numbers
Production CPU	PIV 2.0 GHz, 1GB Ram, 1 GB Disk Space, RAID controller, NIC	1
10 MBPS LAN/WAN Operating System Deployment Environment	Windows 2003 Server*/Windows XP Professional (sp2)*/Linux 2.6.x Apache Tomcat* 5.5* Mysql Community Edition 5.x	1 1 1
Internet Browser (JavaScript enabled)	IE 6 or Above, Mozilla Firefox 3.4, latest versions of Opera, Chrome, Safari	
Postscript viewer	Adobe PDF reader 7 or above	

### 8.2 Installation and Configuration

**1. Installing the war package:** Start the tomcat server and copy the war package into tomcat's web directory (webapps). Tomcat server will attempt to automatically deploy the package.

**2. Configuring the System Variable:** Set the system variable ESTICON which must point to an empty writable directory. This directory will be used by APPLICATION to store configuration files.

**3. Configuring System settings:** **APPLICATION can be configured only if it is being accessed from the local machine.** After completing steps 1 and 2, start tomcat server and Mysql database server. Open web browser and enter the path to the hosted application.

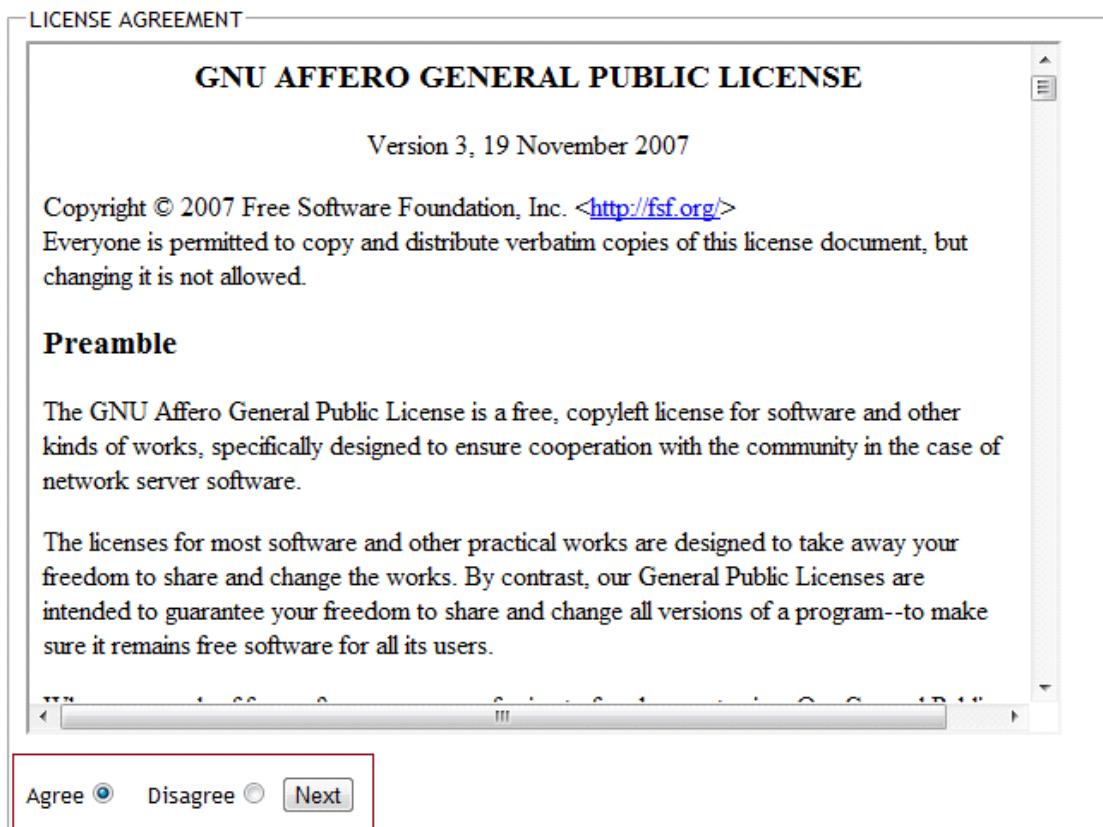

<http://127.0.0.1:TOMCAT-PORT/NAME-OF-WAR-FILE>

The screenshot shows a login interface. At the top, it says "Enter Credential". Below that are two input fields: "User ID" containing "user" and "Password" containing "....". Underneath these fields is a blue "Login" button. At the bottom left, it displays "Number of Active Users: 0/5". To the right of this text is a red-bordered button labeled "Configure".

**Fig 8-1:** Link to configuration page

Click on "Configure" to continue.

**4. Accepting License Agreement:** User must accept the license agreement.

**Fig 8-2:** License Agreement

Select Agree and click on Next.

**5. Checking Environment Variable:** System will automatically check if the ESTICON environment variable has been set correctly:

SYSTEM SETTINGS	
Particular	Status
Environment Variable ESTICON Exists:	✓
License Path [C:\application\esticon] is a writable Directory:	✗
<input type="button" value="Retry"/>	

**Fig 8-3:** Environment variable diagnostics

In case of an error, check if the environment variable ESTICON has been set and if it points to a writable and empty directory (directory must be manually created). Application will store all configuration files in this directory. Directory must not be moved or modified after finishing the configuration. After rectifying errors, click on "Retry" button to continue.

**6. Database Configuration:** Click on the "Database Settings" option.

**Fig 8-4-a:** Configuration Menu

Configure Database Settings

Parameter	Value
Unique Name:	mysql
Driver Name:	com.mysql.jdbc.Driver
Database URL: (no backslash in the end)	jdbc:mysql://localhost:3306
Database Name:	community
Database User:	root
Password:	
Minpool:	1
MaxPool:	5
Max Pool Size:	10
Idle Timeout:	0

**Fig 8-4-b:** Database configuration

Fill-in following details in the Database configuration window:

Database Server URL: ***jdbc:mysql://IP-ADDRESS:PORT-NUMBER***. No trailing backslash or space must be added into the url.

Name of the Database: Enter unique name of the database. This database will be used to store all the application data.

Database User Name: Enter the username having sufficient privileges. The application will try to create the database if it doesn't exist, in case of insufficient privilege this step will fail, and the user will have to create the database manually using console.

Database Password: Enter the password of the database user.

Minpool: Application maintains a pool of connections with the database for faster database access. Minpool defines the minimum number of connections the application must create at startup.

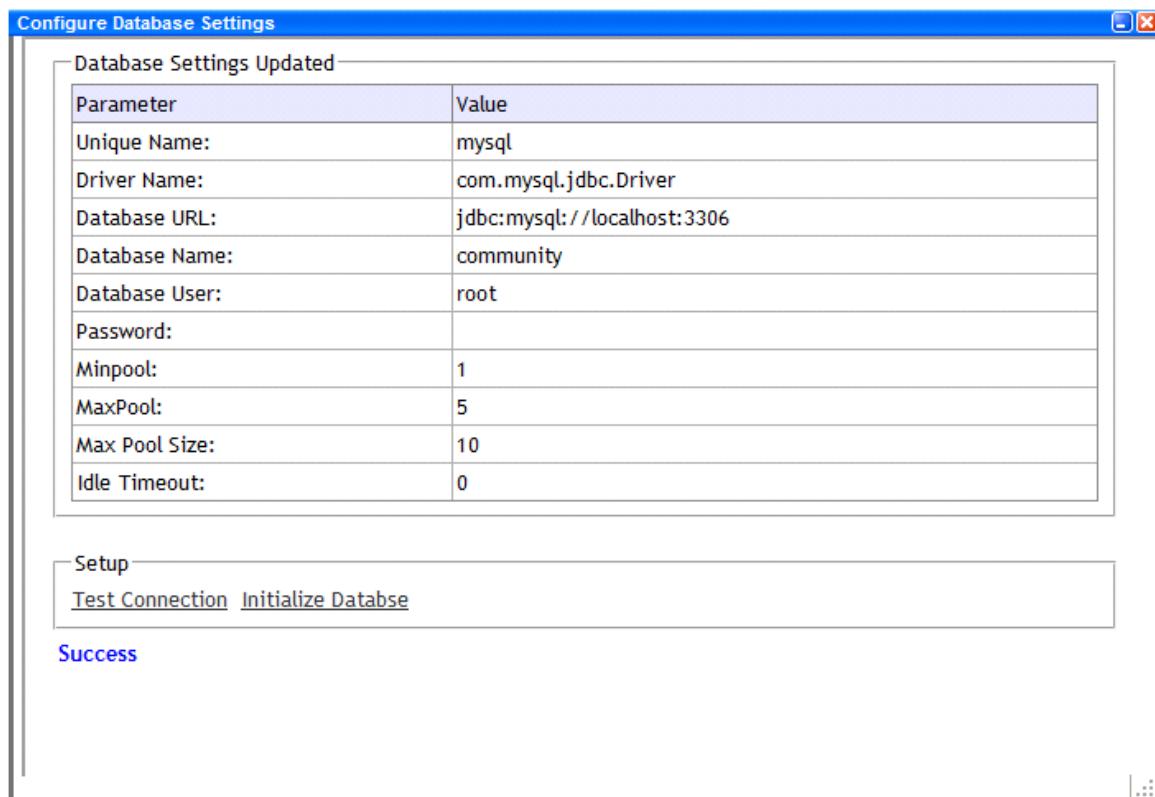

Maxpool: Maximum number of active connections in the database pool. 2 is usually a sufficient number.

Maximum Pool Size: Total number of Active+Inactive database connections in the pool. If the number of connections exceeds this limit, system will attempt to close the inactive connections.

Idle Timeout: Timeout after which a database query is dropped. Set to 0 to ignore.

After filling the details click on the "Submit" button.

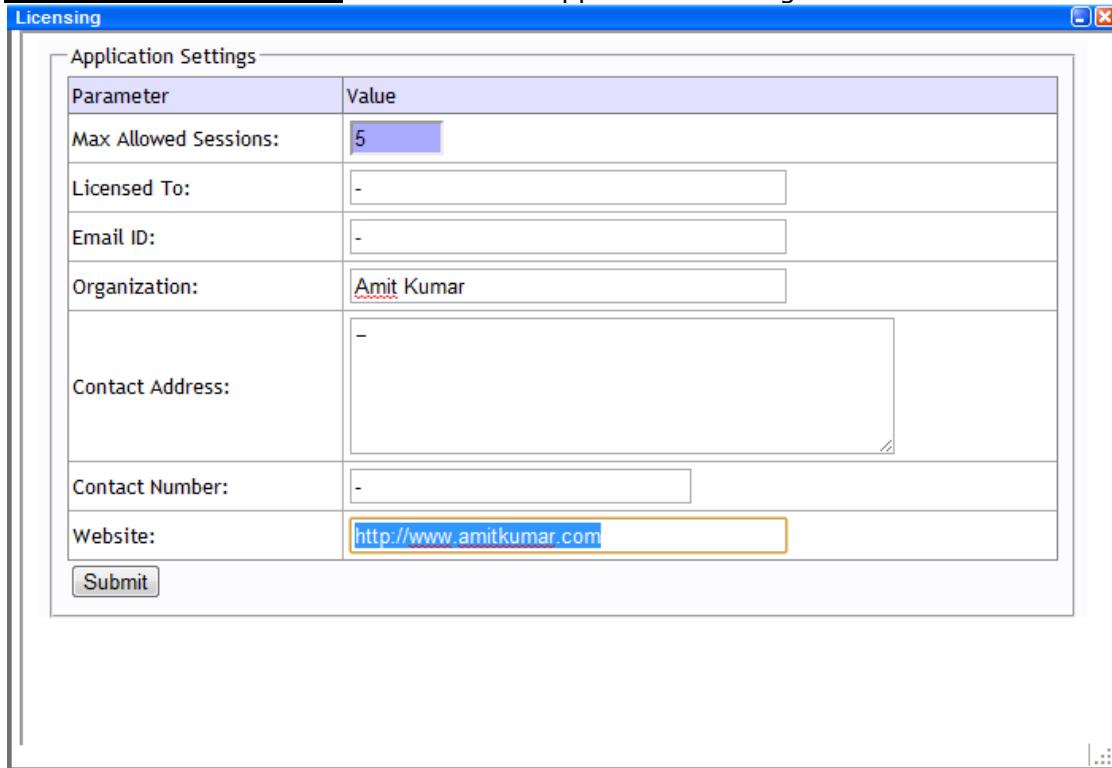

**7. Initializing the database:** Database must be initialized before using the application. To test the connection to the database click on "Test Connection", if the attempt to connect to the database is successful, application will display a success message. In case of a connection failure please check if the database settings have been correctly entered and if the database server is running. If database doesn't exist on server, application will return a failure message, but this is not a fatal error since the application will attempt to create the database (if doesn't exist) during initialization ([Manually creating a mysql database](#)).

**Fig 8-5:** Database initialization

Click on Initialize Database to initialize the database. All database tables will be recreated. In case of a failure, check database settings.

**8. Application Settings:** Click on the "Application Settings" link.

**Fig 8-6:** Application Settings

"Max Allowed Sessions" field is mandatory. The application will not allow a registered user to log into the system if the number of users already logged into

the system is equal to or more than "Max Allowed Sessions".

**9. Logging into the system for the first time:** After finishing the configuration, click on "Home" to return back to the login screen. For the first time usage default username and password are: user and abc respectively.
